## PREFACE

The need for a general index became obvious as the publications of the Geological Survey of Canada grew in number and complexity since the first Report of Progress in 1843. Over the years five of these indices have been published, the last issued in 1932 brought the coverage of all publications up to 1926.

This index, the sixth of the series, covers the period from 1927 to 1950. The initial compilation was started by Cockfield in 1951 and, after his death early in 1956, was completed by Hall and Wright. The assembling and editing of the final manuscript and to a great extent the manner in which the material is presented is the work of Wright.

J. M. HARRISON,  
*Director, Geological Survey of Canada*

OTTAWA, July 17, 1958

## CONTENTS

| Geophysics Papers .....    | 720         |
| Miscellaneous Papers ..... | 720         |
| Water Supply Papers .....  | 721         |

## INTRODUCTION

This index is the sixth in a series issued by the Geological Survey of Canada. The first covers reports published from 1863 to 1884; the second, those from 1884 to 1904; the third, Separate Reports from 1906 to 1910 and Summary Reports from 1905 to 1916; the fourth, Palæontology in reports from 1847 to 1916; and the fifth Memoirs 1910 to 1926, Bulletins from 1913 to 1926, and Summary Reports from 1917 to 1926.

This index covers the period from 1927 to 1950, and includes Memoirs 152 to 257; Economic Geology Series 1 to 15; Geological Bulletins 1 to 16; Museum Bulletins 46, 49, 54, 58, 63, 77, 80 and 103; Summary Reports from 1927 to last issued in 1933; Annual Reports; Preliminary Papers; Geological Maps without reports; a list of Water Supply Papers and one of Miscellaneous Publications; and Geophysics Papers 1 to 23.

Names used are as they appear in the original reports, regardless of any changes in spelling or place names that have been made since the reports were written. Similarly, mining districts, counties, and other land subdivisions appear as used in the reports index.

The change in wording on the title-page of reports and in the caption on maps of the publications indexed may be confusing, for the Geological Survey of Canada from 1927 to 1934 was a Branch of the Department of Mines; from 1935 to 1936, a Division of the Bureau of Economic Geology, Department of Mines; from 1937 to 1947, a Division of the Bureau of Geology and Topography of the Department of Mines and Resources; from 1948 to 1949, a Division of the Mines, Forests and Scientific Services Branch of the Department of Mines and Resources; and in 1950 it became a Branch of the Department of Mines and Technical Surveys.
