

Figure 50. Ice retreat in the study area: (a) Distribution of glaciolacustrine sediments, glaciofluvial sediments, and meltwater channels; (b) Reconstructed ice-front positions during deglaciation. Note that contours are in feet on NTS 93 K (southern half contour interval 1500 ft) and in metres on NTS 93 N (northern half; contour interval 500 m). Legend for part (a) also pertains to part (b).
