LOCKPORT
Fm

- c-up sequence of thinly interbedded bioclastic very coarse crystalline limestone and dark grey bioturbated mudstone - beds have sharp scoured bases, abundant txb and HCS.

ROCHESTER
Fm

- grey to buff coarse crystalline bioclastic dolostone, very fossiliferous with crinoids, horizon of vugs marks bedding, txb, HCS at top.
- c-up sequence of thinly interbedded fine dolostone and green shale, sharp top with ripples.

IRONDEQUOIT
Fm

- c-up sequence of fine to medium crystalline dolostone with minor green mudstone partings, bioturbated, fossils, sharp upper surface with fossil lag and chert.
- grey fine crystalline dolostone with minor green shale partings, sharp bases and tops, bioturbation, fossils, sharp undulating top surface with cherty concretions and thin black algal layer.
