 General strike 330°-340°
 Dip <1°SW

- Rochester - grey to dark grey, very calcareous mudstone, f-up, thin very fine limestone beds have sharp bases and gradational tops and rxl.
- Irondequoit - grey thick bedded medium-to coarse-dolostone, fossiliferous, well sorted, scour based beds.
- Reynales - c-up sequence thin bedded grey fine dolostone with greenish grey siltstone, bioturbated, fossiliferous fragments.
- Thorold - greenish grey fine-grained sandstone, well sorted, thin bedded, silica cemented, general c-up with thin greenish siltstone partings, beds have sharp bases with burrows, horizontal lamination and HCS, rxl at tops.
 - greenish grey sandy siltstone, bioturbated, few thin very fine-grained sandstone beds.
 - grey fine-grained sandstone, well sorted, sharp scoured base, HCS, rxl.
- - red siltstone, burrowed.
- Grimsby - red very fine-grained sandstone, well sorted, micaceous, thin bedded with red silty partings, c-up, sharp bases with scratches and horizontal feeding/resting burrows, gradational bioturbated tops, HCS, brachiopod and shells.
- Cabot Head - reddish grey fine-grained sandstone, well sorted, sharp base, rip ups, burrows, sharp hummocky top with symmetrical ripple, HCS.
 - thinly interbedded greenish and reddish siltstone and fine-grained sandstone, thin bedded, sharp bases, rxl, abundant horizontal burrows, slightly c-up.
