 General strike 330°-340°
 Dip <1°SW

Decew-Lockport

- dark grey calcareous mudstone, bioturbated.

Rochester

- c-up sequence thinly interbedded dark grey mudstone and thin calcarenite, sharp bases, rxl, HCS, burrows.

- c-up sequence thinly interbedded dark grey mudstone and thin calcarenite, sharp bases, rip-ups, rxl, burrows.

Irondequoit

- f-up thick bedded limestone, coarse crystalline, bioclastic, crinoidal, erosive base, sharp top with thin bed of crinoid rubble, gassy smell, HCS.

- c-up sequence thinly bedded grey fine to medium dolostone with grey siltstone partings, very fossiliferous, very sharp irregular base which planes off underlying unit, few thin black mudstone beds at base, brachiopods and crinoids, rip-ups at base.

Reynales

- c-up sequence thick bedded grey to greenish grey f-mss, well sorted, silica cemented, few thin green siltstone beds at base, beds up to 80 cm have sharp scoured bases with grooves, rip-ups, abundant txb, HCS, desiccation cracks at irregular eroded top.

Thorold

- c-up sequence thinly interbedded red fine-grained sandstone and siltstone, beds up to 50 cm with sharp bases, burrows, rxl, HCS, symmetrical ripples, well sorted, txb, desiccation cracks at top.
