

LEGEND

Streamlined landform
(drumlin, groove, or fluting, parallel
to ice flow; undifferentiated)

Crag-and-tail landform

Roche moutonnée

Striation:
Well defined

Poorly defined

Sense unknown

Cross striae (1=oldest)

Digital photograph

Trend of nearshore marine ridges*

Limit of marine submergence*

Esker ridge*

Hummocky moraine*

Trend of ribbed or minor moraine ridges*

Trend of drumlin or fluting*

Trend of crag-and-tail*

Striae*

* Information derived from existing surficial geology map

ACKNOWLEDGMENTS

The following assistants and staff are thanked for their field, cartographic and
logistical support: S. Khan, W. Carter, C. St-Pierre, F. Moffatt, L. Robertson, and
GSC and INAC bedrock mapping groups (S. Hammer, S. Tella, R. Rainbird, C. Relf).
M&T Enterprises (Rankin Inlet) provided expediting services. Polar Continental
Shelf Project provided helicopter support.

This digital map is part of GSC OF 4595 CD-ROM publication (2004).

Striation mapping by P. Henderson, 1998, 1999.
Photo-interpretation by P. Henderson, 2003.
