Table 2. Gold deposits of the Red Lake greenstone belt. Current- and past-producing gold mines ( 1 through  15) are ranked according to size (ounces produced); developed prospects are listed from west ( 16) to east (35); and raw prospects are listed from west (36) to east (105). Various unnamed, unranked gold occurrences, not listed in the table, are shown on the map with unadorned symbols (). Data from compilations by Durocher et al. (1991), Panagapko et al. (2000), and Lichtblau et al. (2003).
