

**Figure 2.** Axial surface trace of major  $F_1$  and  $F_2$  folds and shear zones of the Savant Lake greenstone belt. Stereoplots display orientation data for macroscopic  $F_1$  and  $F_2$  folds, shown on map. Regional faults shown are the Kashaweogama Lake shear zone (KLSZ; discussed in text) and the Miniss River fault zone (MRFZ; Hudec 1965, Breaks et al. 1979).
