

Figure 3. Planar tectonic fabric data. a) first generation planar foliation, S₁, showing contours of poles to planes, and trajectories of S₁ (blue lines) which are axial planar to F₁ folds (Fig. 2). b) second generation planar foliation, S₂, showing contours of poles to planes with a mean pole of 343/8, corresponding to a mean orientation of 073/82 for S₂, and trajectories of S₂ (red lines) which are axial planar to F₂ folds (Fig. 2).
