

DESCRIPTIVE NOTES

This Radioactivity Map of Canada is one of eight 1:5 000 000 national scale thematic maps which depict the surface characteristics of the natural environment. The map is based on data collected from a series of airborne gamma ray spectrometry surveys conducted between 1987 and 2005. The data is presented in the form of a grid of 1000 m x 1000 m cells. The map is based on the following data sources:

- 1. 1:500 000 Scale (1000 m x 1000 m cells) (see legend for details)
- 2. 1:250 000 Scale (4000 m x 4000 m cells) (see legend for details)
- 3. 1:100 000 Scale (16000 m x 16000 m cells) (see legend for details)
