

Quantitative gamma-ray spectrometric and aeromagnetic airborne geophysical survey of the Bonaparte Lake area, British Columbia, was completed by Fugro Airborne Surveys... The airborne gamma-ray measurements were made with an Explorerium GR820 gamma-ray spectrometer... The magnetic field was sampled 10 times per second using a split-beam cesium vapour magnetometer... Digital versions of the map, corresponding digital profile and gridded data, and similar data for adjacent aeromagnetic and gamma-ray spectrometric surveys can be downloaded, at no charge, from Natural Resources Canada's Geoscience Data Repository...
