

Photos originales de E.A. Hodgson lors de son levé post-séisme de mars 1925 et texte original apparaissant à l'endos des photographies.

1. The Palais station, Quebec. The inside of the north wall of this station was damaged, several rows of bricks falling into the waiting room.

2. Interior of Palais Station, Quebec. Drowning scaffold in place.

3. The skylight of Palais Station Quebec, damaged by the earthquake. This picture was taken before the damage.

4. View from city hall Quebec. Showing ice arches and statues.

5. Icicles on Neptune Inn, Quebec. Not destroyed by the earthquake.

6. Ice on warehouse near river, Quebec – not fallen 6 days after earthquake.

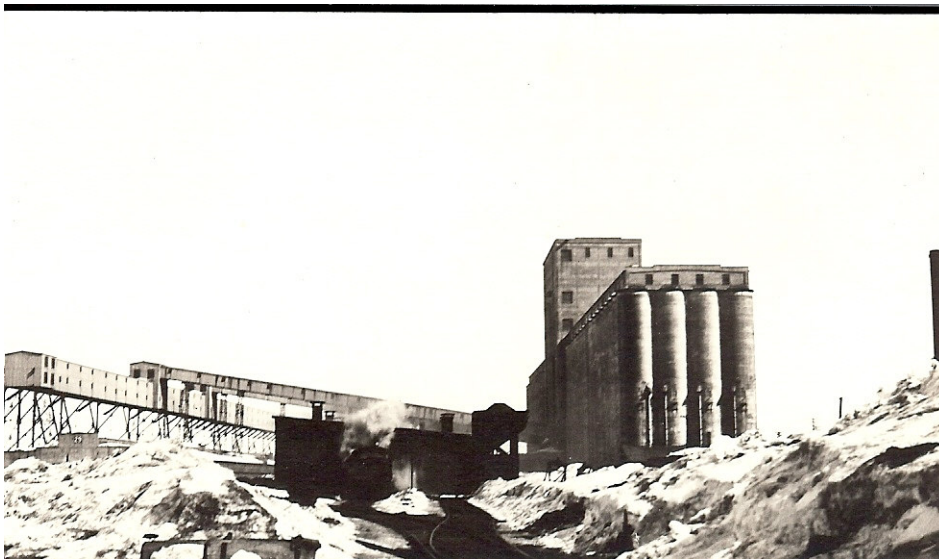

7. Sous le Cap., Quebec.

8. View toward grain elevators Palais Station, Quebec.

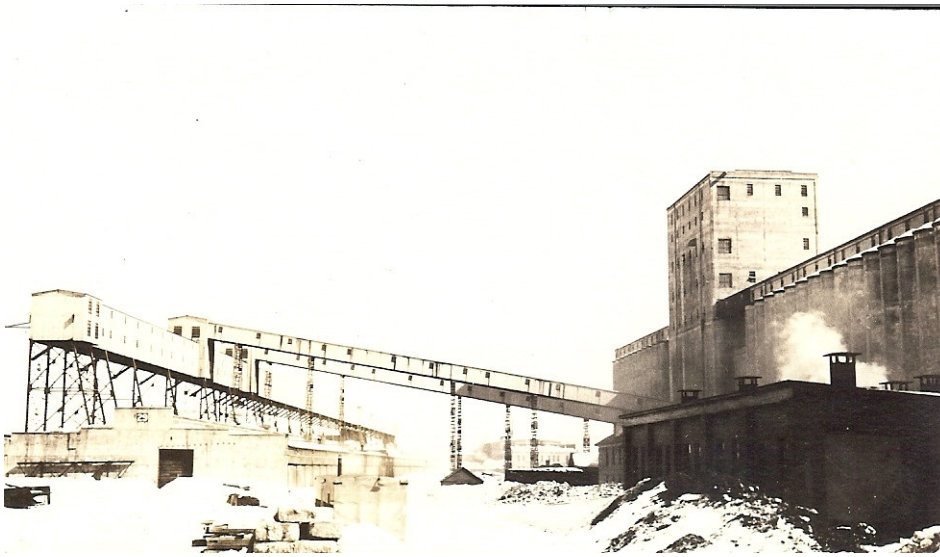

9. The grain elevator and the sheds on the St. Charles River, Quebec. This picture was taken from the deck of the ferry at Levis.

10. View of grain elevator and grain galleries above shed at Harbour Quebec.

11. The grain elevator and shed 29 Quebec.

12. Shed 29, Quebec Harbour Commission.

13. The grain elevators, Quebec – Harbour Commission.

14. Shed 29. Quebec – Harbour Commission.

15. The interior of Shed 29 at the Harbour Quebec. The picture shows a section of the roof of the shed made of blocks of concrete, falled in after the earthquake. No one was in the building at the time.

16. This indicates the shift of the column feet in shed 29. The columns are of steel I beams, the cross of the beam being 15" and the base 25" square. The actual shift is indicated below.

17. Showing the way in which the angle iron braces between the north column feet and the feet of the columns in the next row were bent down and to the east in the centre at the time of the earthquake.

18. Crack in the ground at Quebec. This crack runs almost due east-west and is between the shed 29 etc. and the St. Charles River.
