

HUDSON BAY

BAIE D'HUDSON

DESCRIPTIVE NOTES

The Radioactivity Map of Manitoba is one of a set of eight 1:100,000 regional completion maps that indicate the natural air absorbed dose rate of radioactivity in the province of Manitoba. The map was produced using data from the Digital Chart of the World (DCW) and the National Air Absorbed Dose Rate Survey of Manitoba. The map is based on a grid of latitude and longitude lines and shows the distribution of radioactivity across the province. The map is titled 'NATURAL AIR ABSORBED DOSE RATE RADIOACTIVITY MAP OF MANITOBA'.
