

**Photos 15a to 15f. Section 12 Loretta Canyon.**

**Figure 15a.** Aerial view of upper Katherine Group overlain by bright red- to buff-weathering Mount Clark(?)/Mount Cap Formation, Loretta Canyon Section.

**Figure 15b.** Mount Clark(?) red beds down-cut into upper Katherine Group, upstream of waterfall in Figure 15a.

**Figure 15c.** Lower Mount Cap Formation sandstone, shale, and dolostone overlying Mount Clark(?) medium- to coarse-grained red beds.

**Figure 15d.** Extensively bioturbated, glauconitic sandstone, lower Mount Cap Formation, in downstream section (Unit 8).

**Figure 15e.** Downstream section of bioturbated, thin- to medium-bedded, cross-bedded sandstone of Mount Cap Formation.

**Figure 15f.** Top of brecciated, dolosiltstone bed, upper Mount Cap Formation.
