

Photos 17a to 17f. Section 14 Graffe River.

Figure 17a. Mount Clark(?) Formation thick-bedded sandstone overlying Proterozoic Little Dal Group, upper Graffe River canyon.

Figure 17b. Coarse-grained to conglomeratic, trough cross-bedded sandstone of Mount Clark(?) Formation.

Figure 17c. Overview of Mount Cap Formation, middle Graffe River canyon.

Figure 17d. Cross-beds, lower Mount Cap Formation, have north-dipping troughs which show east-dipping mega-ripples on upper surface.

Figure 17e. Interbedded, bioturbated siltstone and cross-bedded sandstone, middle Mount Cap Formation.

Figure 17f. Pinch and swell and boudinage within thin-bedded siltstone, dolostone, and black shale (Unit 32), upper Mount Cap Formation.
