## INTRODUCTION

This index lists all publications of the Geological Survey of Canada issued between 1959 and mid-1964 and replaces supplements for 1959, 1960 and 1961, 1962, and Paper 64-3. It is continuous with the index prepared by A.G. Johnston issued in 1961 and presents the material in exactly the same manner. The two indexes together list all publications by the Geological Survey since its inception.

As in the earlier volume, Part I is a catalogue of publications issued during the interval covered, and Part II is a finding list based on the National Topographic System. Reports or maps on specific areas are listed under the lettered and numbered NTS unit in which they lie (43 B), more general publications by numbered unit only (43) and general works by province or territory or simply under Canada. An index map of Canada showing the NTS units is in the pocket.

The last section of the report is an index that lists in alphabetical order the authors of all publications in both indexes, the references to publications in the earlier volume being in italics.
