

Gamma-ray spectrometric and aeromagnetic airborne geophysical survey of Miertsching Lake area, Nunavut, was completed by Sander Geophysics Limited. The survey was flown on 4th August 2009 using a Cessna 441QII aircraft. The terrain elevation data were collected using a GPS receiver. The flight path was recorded using a differential GPS receiver. The survey was completed in 10 days. The flight path was recorded using a differential GPS receiver. The survey was completed in 10 days. The flight path was recorded using a differential GPS receiver. The survey was completed in 10 days.

This airborne geophysical survey and the production of this map were funded by the Geo-mapping for Energy and Minerals (GEM) Program of the Earth Sciences Sector, Natural Resources Canada. Digital versions of this map and the corresponding digital data, geophysical data and aeromagnetic data are available for individual survey areas may be downloaded, at no charge, from Natural Resources Canada's Geoscience Data Repository for Geophysical and Geomagnetic Data at <http://www.nrcregistry.gc.ca>.
