

MAP SCALES

The scale of a topographic map in Canada is expressed by a figure such as 1:50 000 or 1:250 000. This scale is the relationship between distance on the map and the actual distance on the ground. In other words 1:50 000 means that 1 unit of measurement on the map equals 50 000 units of the same measurement on the ground.

ÉCHELLES CARTOGRAPHIQUES

Au Canada, l'échelle d'une carte topographique est indiquée par des chiffres tels que 1:50 000 ou 1:250 000. Cette échelle indique le rapport entre la distance montrée sur la carte et la distance réelle sur le terrain. Autrement dit, 1:50 000 signifie qu'une unité de mesure sur la carte est égale à 50 000 unités de la même mesure sur le terrain.

The 1:250 000 map series of Canada is the only complete topographic coverage of the country. All previous maps, at smaller scales, give only an approximate indication of the topography. The 1:250 000 series covers Canada with 917 sheets. This scale allows a detailed depiction of relief, drainage, transportation facilities, forest cover, and centres of population.

La série de cartes à 1:250 000 du Canada est la seule couverture complète du pays. Toutes les cartes précédentes, à de plus petites échelles, ne donnent qu'une indication approximative de la topographie. La série à 1:250 000 couvre tout le Canada avec 917 cartes. Cette échelle permet une description détaillée du relief, du réseau hydrographique, des voies de communication, des forêts et des centres démographiques.
