

Earthquake activity 5: **Design an Informative Brochure on Earthquakes and Safety**

Description: Students create a brochure about earthquakes, focusing on advice on how to increase personal safety.

Materials: student worksheet

Teacher instructions:

Have the class research earthquake preparedness and then to create an informative brochure advising people about how we can prepare for earthquakes to increase our safety.

Name: _____

Earthquake Brochure

Design and create a brochure to teach people how to stay safe in an earthquake. Fold a piece of paper in three sections. You can work on both sides of the paper.

Your goal is to tell people about earthquakes and let them know how to stay safe in an earthquake.

The information should cover what to do in advance to reduce risk, what to do during an earthquake, and what to do after an earthquake happens.

Information can be found on these websites:

- Public Safety Canada <http://getprepared.ca/KNW/ris/eq-eng.aspx>
- Geological Survey of Canada: http://earthquakescanada.nrcan.gc.ca/index_e.php

Include pictures or drawings to make your brochure more interesting.
