

Quaternary geology offshore Avalon Peninsula
Newfoundland and Labrador
Seal Cove to Motion Bay

**Bear Cove Point to Cape Neddick
Stratigraphic sequence of Quaternary sediments**

Edward (Ned) L. King and Nader Mostaghimi*

Scale 1: 80 000

Assisting compiler: Helen Neilson*, Bathymetric Digital Elevation Model

Sub-surface and seabed distribution of the succession of Quaternary map units is presented, from base to top, as colour-coded lines overlapping in stratigraphic sequence. The Quaternary Geology map (Sheet 1) has complete map unit descriptions.

Derived from limited geophysical traverse data with broad extrapolations based on topographic character

Sparse spot bathymetry points and incomplete datum adjustments result in topographic artefacts in the bathymetric digital elevation model, especially in the areas farther offshore. This includes apparent orientations of features which are incorrect.
