TOPICAL REPORT NO. 104

CATALOGUE OF THE
REPRESENTATIVE ROCK COLLECTION
LISTING ACQUISITIONS TO JUNE 1964

by
K.R. Dawson

OTTAWA

1965

INTRODUCTION

This catalogue of the Representative Rock Collection of the Geological Survey of Canada was compiled to provide a convenient listing of its contents and as a test of procedures for the automated production of topical reports. The collection was begun in 1958 and now contains 300 suites totalling between 8,000 and 10,000 specimens. Each suite consists of 60 to 100 handspecimens and the related thin sections for areas the size of one half of a four mile topographic map.

The information pertaining to the collection has been recorded on IBM cards supplemented by index maps showing the location of each specimen. This catalogue lists the National Topographic Series (N.T.S.) numbers, province, collector's name, stratigraphic age, formation name, general rock type, literature reference, and work performed. The N.T.S. number listed in sequence is the primary reference in this catalogue and the other information is tabulated beside it.

The tabular catalogue has been printed by the Department of Mines and Technical Surveys IBM 407 printer directly from the catalogue cards on "Duplimat Master"¹ whereas the introductory pages were reproduced by the same method using typewritten copy.

Grateful acknowledgement is made of the technical advice and assistance provided by Messrs. J.D. MacIlroy and H.J. Webster of the International Business Machines Company Ltd., Ottawa office. The production of the "Duplimat Master" by personnel of the Department of Mines and Technical Surveys - Electronic Data Processing Section and of the Geological Survey is gratefully acknowledged.

¹ "Duplimat Master" is the trade name for a type of stencil that is prepared by typing on specially treated paper. The resulting master copies are reproduced on a small press.

The following pages describe briefly the code used in the catalogue.

| Column | Remarks | | | | | | | | | | | | | | |
|-------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------|-----------------|----------------|------------|-------------------------|---------------------|------------------|----------|-----------|--------------|------------|-------------|-------------|-------------|
| 1 | National Topographic System (N.T.S.) numbers listed in sequence. | | | | | | | | | | | | | | |
| 2 | Province or territory coded alphabetically as follows. <table><tbody><tr><td>A. Newfoundland</td><td>H. Saskatchewan</td></tr><tr><td>B. Nova Scotia</td><td>I. Alberta</td></tr><tr><td>C. Prince Edward Island</td><td>J. British Columbia</td></tr><tr><td>D. New Brunswick</td><td>K. Yukon</td></tr><tr><td>E. Quebec</td><td>L. Mackenzie</td></tr><tr><td>F. Ontario</td><td>M. Keewatin</td></tr><tr><td>G. Manitoba</td><td>N. Franklin</td></tr></tbody></table> | A. Newfoundland | H. Saskatchewan | B. Nova Scotia | I. Alberta | C. Prince Edward Island | J. British Columbia | D. New Brunswick | K. Yukon | E. Quebec | L. Mackenzie | F. Ontario | M. Keewatin | G. Manitoba | N. Franklin |
| A. Newfoundland | H. Saskatchewan | | | | | | | | | | | | | | |
| B. Nova Scotia | I. Alberta | | | | | | | | | | | | | | |
| C. Prince Edward Island | J. British Columbia | | | | | | | | | | | | | | |
| D. New Brunswick | K. Yukon | | | | | | | | | | | | | | |
| E. Quebec | L. Mackenzie | | | | | | | | | | | | | | |
| F. Ontario | M. Keewatin | | | | | | | | | | | | | | |
| G. Manitoba | N. Franklin | | | | | | | | | | | | | | |
| 3 | Collector's surname - coded alphabetically by two letters assigned by the Chief Geologist's office (Table I) or by one letter, the first letter of the surname. The single letter code applies to Geological Survey Personnel employed before the new coding scheme was introduced and also to individuals not in the employ of the organization. | | | | | | | | | | | | | | |

Column

Remarks

4

Stratigraphic age - a number if coded by Era only -
a number and a letter if coded by Era and Period.

Eras

- | | |
|----------------|-------------|
| 1. Archaean | 4. Mesozoic |
| 2. Proterozoic | 5. Cenozoic |
| 3. Palaeozoic | |

Periods

- | | |
|----------------|------------------------|
| A. Keewatin | I. Mississippian |
| B. Timiskaming | J. Pennsylvanian |
| C. Huronian | K. Permian |
| D. Keweenawan | L. Triassic |
| E. Cambrian | M. Jurassic |
| F. Ordovician | N. Cretaceous |
| G. Silurian | O. Tertiary |
| H. Devonian | P, Q, R, S. Quaternary |

5

Stratigraphic unit name - a four letter code consisting
of the first letter combined with the next three
consonants. e.g. Sibley = SBL; Pontiac = PNTC.

6

General rock classification - five broad groups.

- | | |
|--------------------------|---------------------------|
| 1. Sedimentary rocks | 4. Intrusive melanocratic |
| 2. Extrusive rocks | 5. Metamorphic rocks |
| 3. Intrusive leucocratic | |

| Column | Remarks |
|--------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| 7 | Literature reference - maximum of 4 letters for the title of the publication - three numbers for the volume - three numbers for the page - two numbers for the decade and year of publication. e.g. Geological Survey of Canada, Memoir 250 = GSCM 250 000 00. |
| 8 | Catalogue or serial number - comprised of a maximum of five digits - the first three are the tray numbers and the last two are the specimen numbers for a particular tray. Index maps are filed near the collection. |
| 9 | Work performed - a maximum of three digits. These are positioned in three adjoining columns on the cards. From left to right the number 1 will represent; thin section available; petrographic description on card; modal analysis available. The number 2 will represent; study collection; chemical analysis; magnetic susceptibility measurement. The number 3 will represent; age determination; fossil identification; and typical mineral observed. |
