

Mines Branch Information Circular IC 223

BIBLIOGRAPHY OF HIGH-TEMPERATURE CONDENSED  
STATES RESEARCH PUBLISHED IN CANADA,  
APRIL - JUNE, 1969

by

Norman F.H. Bright\*

SYNOPSIS

This report contains bibliographic information concerning research work on high-temperature condensed states published in Canadian journals from April 1 to June 30, 1969.

\*Head, Physical Chemistry Section, Mineral Sciences Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Canada.

Direction des mines, Circulaire d'information IC 223

BIBLIOGRAPHIE DES RECHERCHES EFFECTUÉES  
DANS LE DOMAINE DES ÉTATS CONDENSÉS AUX  
TEMPÉRATURES ÉLEVÉES, AU CANADA,  
D'AVRIL À JUIN, 1969

par

Norman F.H. Bright\*

RÉSUMÉ

Le présent rapport contient des renseignements bibliographiques sur les recherches effectuées sur les états condensés aux températures élevées, publiées dans les revues scientifiques canadiennes au cours de la période d'avril 1 à juin 30, 1969.

---

\*Chef, Section de la chimie physique, Division des sciences minérales,  
Direction des mines, ministère de l'Énergie, des Mines et des Ressources,  
Ottawa, Canada.

## INTRODUCTION

This report is a further contribution to the series of bibliographic bulletins of information on high-temperature condensed states research that have been published as Mines Branch Information Circulars since March 1960 on behalf of the Commission on High Temperatures and Refractories of the International Union of Pure and Applied Chemistry. The present document covers the three-month period from April 1 to June 30, 1969, and gives details of work published in Canadian scientific and technical journals during that period.

Anyone not now receiving these reports who wishes to do so, or anyone who currently receives these bibliographies but to whom they are no longer of interest, is requested to advise the compiler accordingly so that the appropriate changes may be made in the relevant mailing lists.

The compiler would very much appreciate being advised of any work published in Canadian journals, and lying within the scope of these bibliographies, that has escaped his notice in order that such work may be mentioned in a subsequent issue of this series of Information Circulars.

Any further information concerning these bibliographies or any of the other relevant IUPAC activities can be obtained from the compiler of this report at the following address:

Dr. Norman F. H. Bright,  
Mineral Sciences Division,  
Mines Branch,  
Department of Energy, Mines and Resources,  
555 Booth Street,  
Ottawa 1, Ontario.

The recipients of these bibliographies are reminded that they will no longer receive gratis copies of the quarterly bibliographies published on an international basis, for both condensed- and gaseous-states work, by the National Bureau of Standards, Washington, D. C. As detailed in the immediately preceding issue of this series of Information Circulars, those wishing to receive these international documents should purchase them from the Superintendent of Documents, National Bureau of Standards, Washington, D. C., 20234, U.S.A. They should ask for NBS Special Publication 315.

BIBLIOGRAPHY OF WORK ON HIGH-TEMPERATURE  
CONDENSED STATES PUBLISHED IN CANADA,  
APRIL - JUNE, 1969

International Union of Pure and Applied Chemistry  
Commission on High Temperature and Refractories

Bibliography (April 1 to June 30, 1969)  
for Canada

collected by Dr. Norman F.H. Bright, Mines Branch, Ottawa.

- - -

A. Devices for achieving temperatures above 1500°C

Nil

B. Devices for measuring and controlling temperatures above 1500°C

1. Know your Thermocouples for Better Temperature Control.  
Harold Koenen (West Instrument Corporation).  
Canad. Controls and Instr., 8 [5], 30-33 (1969).

C. Devices for physical measurements at temperatures above 1000°C

Nil

D. Properties, at temperatures below 1000°C, of materials that melt above 1500°C

a. Metallic materials

1. Electrical Resistivity of Binary Chromium Alloys with Vanadium, Niobium and Tantalum.  
Sigurds Arajs (Department of Physics, Clarkson College of Technology, Potsdam, New York, U.S.A.).  
Canad. Journ. Phys., 47 [9], 1005-1010 (1969).

b. Non-metallic materials

1. An Introduction to the Theory, Measurement and Application of Semiconductor Transport Properties of Minerals.  
T.M. Baleshta and H.P. Dibbs (Mineral Sciences Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Ontario).

Mines Branch Technical Bulletin TB 106, January, 1969  
(Department of Energy, Mines and Resources, Ottawa, Ontario).

2. Electron Spin Resonance of  $Mn^{2+}$  Impurities in Monticellite.  
A. G. Danilov and A. Manoogian (Department of Physics, University of Ottawa, Ottawa, Ontario).  
Canad. Journ. Phys., 47 [8], 839-846 (1969).
  3. On the Origin of Colour and Pleochroism of Astrophyllite and Brown Clintonite.  
P. G. Manning (Mineral Sciences Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Ontario).  
Canad. Mineralogist, 9 [5], 663-677 (1969).
  4. An Optical Absorption Study of the Origin of Colour and Pleochroism in Pink and Brown Tourmalines.  
P. G. Manning (Mineral Sciences Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Ontario).  
Canad. Mineralogist, 9 [5], 678-690 (1969).
  5. Optical Absorption Studies of Grossular, Andradite (var. Colophonite) and Uvarovite.  
P. G. Manning (Mineral Sciences Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Ontario).  
Canad. Mineralogist, 9 [5], 723-729 (1969).
  6. Crystal Structure of  $\beta'$ - $Mn_3(PO_4)_2$ .  
J. S. Stephens and C. Calvo (Department of Physics and Institute for Materials Research, McMaster University, Hamilton, Ontario).  
Canad. Journ. Chem., 47 [12], 2215-2225 (1969).
  7. The Floatability of Twenty-One Non-Metallic Minerals.  
R. A. Wyman (Mineral Processing Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Ontario).  
Mines Branch Technical Bulletin TB 108, January, 1969  
(Department of Energy, Mines and Resources, Ottawa, Ontario).
- c. Mixed materials

Nil

E. Properties, at temperatures above 1000°C, of materials that melt above 1500°C

a. Metallic materials

1. Interpretation of Kinetic Data for the Decarburization of Iron Droplets.  
L. A. Baker (University of New South Wales, Australia).  
Canad. Met. Quart., 7 [4], 217-221 (1968).
2. Iron Powder Production.  
H. R. Huffman (Peace River Mining and Smelting Ltd., Edmonton, Alberta).  
Canad. Inst. Min. Met. Bull., 62 [686], 635-637 (1969).

b. Non-metallic materials

Nil

c. Mixed materials

Nil

F. Properties, at temperatures above 1000°C, of materials that melt below 1500°C

a. Metallic materials

Nil

b. Non-metallic materials

1. Thermodynamic Properties of PbO-SiO<sub>2</sub> Slags by EMF Measurements.  
G. G. Charette and S. N. Flengas (Department of Metallurgy and Materials Science, University of Toronto, Toronto, Ontario).  
Canad. Met. Quart., 7 [4], 191-200 (1968).

c. Mixed materials

Nil

G. Phase Equilibria

1. Origin of the Tulameen Ultramafic-Gabbro Complex, Southern British Columbia.  
D. C. Findlay (Geological Survey of Canada, Whitehorse, Yukon Territory).  
Canad. Journ. Earth Sci., 6 [3], 399-425 (1969).
2. High-Pressure Experimental Studies on the Origin of Anorthosite.  
Trevor H. Green (Hoffman Laboratory, Harvard University, Cambridge, Massachusetts, U.S.A.).  
Canad. Journ. Earth Sci., 6 [3], 427-440 (1969).
3. Diffusion in Multi-Component Metallic Systems, X: Diffusion at or near Ternary Critical States.  
J. S. Kirkaldy and G. R. Purdy (Department of Metallurgy and Materials Science, McMaster University, Hamilton, Ontario).  
Canad. Journ. Phys., 47 [8], 865-871 (1969).
4. The System  $\text{CaF}_2$ - $\text{CaMgSi}_2\text{O}_6$ .  
S. B. Lin and B. J. Burley (Department of Geology, McMaster University, Hamilton, Ontario).  
Canad. Journ. Earth Sci., 6 [2], 269-280 (1969).
5. An Analytical Method for Calculating Thermodynamic Data in Ternary Systems.  
A. D. Pelton and S. N. Flengas (Department of Metallurgy and Materials Science, University of Toronto, Toronto, Ontario).  
Canad. Journ. Chem., 47 [12], 2283-2292 (1969).

H. Reactions at temperatures above 1000°C

1. Factors Affecting the Reoxydation of Molten Steel During Continuous Casting.  
J. Little, M. van Oosten and A. McLean (Department of Metallurgy and Materials Science, McMaster University, Hamilton, Ontario).  
Canad. Met. Quart., 7 [4], 235-246 (1968).
2. Inco Develops New Route to Pure Nickel.  
Paul Queneau, C. E. O'Neill, A. Illis and J. S. Warner (International Nickel Company of Canada, Copper Cliff, Ontario).  
Canad. Chem. Proc., 53 [4], 67-70 (1969).
3. Studies on Metal Hydroxy-Compounds, VII: Thermal Analyses of Copper Derivatives.  
P. Ramamurthy and E. A. Secco (Chemistry Department, St. Francis Xavier University, Antigonish, Nova Scotia).  
Canad. Journ. Chem., 47 [12], 2185-2190 (1969).

4. Decarburization of Iron-Carbon Alloys by Argon-Oxygen Mixtures.  
S.G. Whiteway, R.J.W. Peters, W.D. Jamieson and C.R. Masson  
(National Research Council of Canada, Atlantic Regional Laboratory,  
Halifax, Nova Scotia).  
Canad. Met. Quart., 7 [4], 211-215 (1968).

J. Review Articles
