AN INDEXED LIST OF REFERENCES ON CONTINUOUS CASTING

by

R. Thomson\*

- - - - -

ABSTRACT

A list of references to the technical literature on continuous casting, covering the period ~ 1940 to 1969, is presented and indexed with respect to subject matter and author.

RÉSUMÉ

L'auteur présente une liste des références techniques sur la coulée continue publiées durant la période 1940 à 1969. L'index réfère au sujet et aux auteurs.

---

\* Research Scientist, Non-Ferrous Metals Section, Physical Metallurgy Division, Mines Branch, Department of Energy, Mines and Resources, Ottawa, Canada.

#### AUTHOR'S PREFACE

This bibliography was assembled during the course of post-graduate work on continuous casting. It makes no claims to being an exhaustive list of references and does not cover the patent literature. It is merely intended to facilitate an introduction to specific aspects of the subject, and to provide a broad base upon which more highly specialised personal reference files may be built by the user. While entry into the list will normally be made via the Subject Index, those readers prone to browsing may note that references dealing with non-ferrous materials have been concentrated in the first half of the list, while items specific to iron and steel follow in the remainder. An attempt has been made to maintain a chronological order inside these two segregated areas.

SUBJECT INDEX

- Air-gap 104, 108
  - in composite mould 318, 327
  - liquid metal in 186
  - measurement of 327
  - theory of formation of 171
- Algoma practice 607, 621
- Allegheny-Ludlum practice 343, 344
- Aluminium methods for 28, 60, 73, 123, 161, 164, 191
  - bar 148, 154, 301
  - directional properties 70, 71, 92
  - direct chill casting 41, 51, 297
  - graphite moulds for 236, 429
  - Hazelett sheet 60, 336
  - large sections 55, 117, 263
  - properties 41, 323, 724
  - rod for wire 56, 63, 89, 209, 283, 294, 324, 653, 685
  - melting and casting 73, 226
  - segregation in 179, 429
  - siphoning of 480
  - twinning 41, 724
- Aluminium alloys 161, 221, 718
  - residual stress in 62
- Aluminium bronze 174, 308, 321, 429
- Al-Cu-Mg - 173
- Al-Mn - 655
- Al-Pb - 691
- Al-Sn - 146, 429
- Al-U - 260, 322
- Al-Zr - 283
- Ampoloy bronze 13
- Analogue techniques, fluid flow 539, 540, 635, 636
  - solidification 88, 542, 635, 636
  - temperature field 88
- Apex process 102, 105
- Appleby-Frodingham practice 452, 519
- Argon cover 558, 579

- Armco practice 529, 550
- Asarco process 25, 67, 121, 130, 131, 190
  - tough pitch copper 153
  - shapes 33, 91
- Atlas practice 358, 365, 385, 390, 515
- Automatic control 344, 424, 507, 594, 606, 684, 733
- B.O.F. steelmaking 487, 499, 652
- Barrow practice 407, 721
- Bearing alloys 17, 146
  - bronzes 68, 232, 276
- Beryllium bronze 128
  - in vibrating moulds 157, 176
- Billets, alloy steel 347
  - copper alloy 184, 259, 263
  - German practice 29
  - hollow 259
  - rupture 355
  - solidification 40
- B.I.S.R.A. practice 395
