THE  
PRODUCTION OF ASBESTOS  
IN  
CANADA

During the Calendar Years

1907-8

BY

JOHN McLEISH, B.A.

*Chief of the Division of Mineral Resources and Statistics*

OTTAWA  
GOVERNMENT PRINTING BUREAU  
1909

ADVANCE CHAPTER OF THE ANNUAL REPORT ON THE MINERAL PRODUCTION  
OF CANADA DURING THE CALENDAR YEARS 1907 AND 1908.

## ASBESTOS

Asbestos is mined in Canada in the Eastern townships, Province of Quebec, at Black Lake, Thetford, East Broughton and Danville. Other occurrences of the mineral have been noted, and some shipments were at one time made from the township of Denholm, in the county of Wright, north of the city of Ottawa, but the first-mentioned districts are the only localities in which mining is at present being carried on. The mining of asbestos in this region dates from about 1878, and statistics of production since 1880 are shown in tables following. The value of the annual output has grown from less than \$25,000 in 1880 to over \$2,573,000 in 1908, so that next to coal this is now one of the most important of non-metallic mineral products, and supplies a very large proportion of the world's demand. A special report on this subject has been published by this branch, though now unfortunately out of print. A revised edition is, however, in course of preparation.

### PRODUCTION.

A portion of the output is sufficiently high grade to be shipped as crude; the greater part, however, is crushed and the fibre extracted by special machinery. A uniform system of classification has not yet been adopted by the operating companies, but for statistical purposes the shipments have been classified on a valuation basis, the crude being divided into two classes and the mill fibre into three grades; the short fibred, asbestic, and sand, being separately classified.

The total shipments in 1908 aggregated 90,773 tons valued at \$2,573,335, as compared with shipments in 1907 of 90,426 tons valued at \$2,505,042, the shipments in 1908 being the largest both in tonnage and value yet recorded. Details are given in Table 1.

ASBESTOS.—TABLE 1.

Production by Classes, Calendar Years 1907 and 1908.

	1907.			1908.		
	Short Tons.	Value.	Per ton.	Short Tons.	Value.	Per ton.
		\$	\$ cts.		\$	\$ cts.
Crude, No. 1.....	1,419	374,275	263 76	857 $\frac{1}{2}$	257,752	300 59
" " 2.....	2,908	456,357	156 93	2,488	411,480	165 38
Mill Stock, No. 1.....	3,675	300,925	81 88	5,282 $\frac{1}{2}$	425,448	80 54
" " 2.....	43,821	1,247,073	28 46	45,545 $\frac{1}{2}$	1,345,750	29 33
" " 3.....	10,307	106,132	10 30	12,374 $\frac{1}{2}$	114,931	9 29
Total asbestos.....	62,130	2,484,767	39 99	66,548	2,555,361	38 40
Total asbestic.....	28,296	20,275	0 72	24,225	17,974	0 74
Grand total.....	90,426	2,505,042	.....	90,773	2,573,335	.....

While the average prices in each class are given in the above, the classification is based approximately on the following maximum and minimum prices per ton:—

**Range of Prices of Asbestos During the Years 1907-8.**

	1907.		1908.	
	\$ c.	\$ c.	\$ c.	\$ c.
Crude, No. 1.....	225 00	to 300 00	267 00	to 350 00
" " 2.....	100 00	" 200 00	75 00	" 225 00
Mill Stock, No. 1.....	57 00	" 163 00	60 00	" 100 00
" " 2.....	18 00	" 50 00	20 00	" 50 00
" " 3.....	8 00	" 15 00	5 00	" 13 00
Asbestic.....	0 50	" 2 00	0 35	" 1 16

Although the total tonnage shipped in 1908 was only 347 tons in excess of the 1907 shipments, it will be seen that the amount of crude shipped in 1908, despite a higher average price, was less than the 1907 crude shipments by 981 tons. The fibre shipments on the other hand were 5,399 greater in 1908, and brought a higher average return per ton of \$1.22. The asbestic shipments in 1908 were 4,071 less than in 1907.

In Table 2, following, the production of crude asbestos and mill stock since 1903 is separately shown. The statistics indicate that during the past six years there has been only a slight increase in the quantity shipped as crude, although the average price has nearly doubled; while on the other hand the shipments of mill stock have increased over 125 per cent in the same time, with an increase of over 50 per cent in the average price per ton obtained.

ASBESTOS.—TABLE 2.

**Annual Production of Crude and Mill Stock 1903-1908.**

Calendar Year.	CRUDE.			MILL STOCK.		
	Short Tons.	Value.	Per ton.	Short Tons.	Value.	Per ton.
		\$	\$ cts.		\$	\$ cts.
1903.....	3,134	361,867	115 46	27,995	554,021	19 79

(a) Figures of export taken as production.

#### EXPORTS AND IMPORTS.

Supplying as it does the greater part of the world's demand, the Canadian output of asbestos finds a wide distribution.

During the twelve months ending March 31, 1908, exports were made as follows:—

Countries.	Tons.	Value.	Countries.	Tons.	Value.
		\$			\$
Great Britain.....	5,347	237,152	Italy.....	814	21,678
Belgium.....	3,372	86,871	Japan.....	97	3,177
France.....	2,332	50,612	United States.....	46,846	1,322,890
Germany.....	225	5,196			
			Total.....	59,033	1,730,575

Exports to Great Britain, United States, Germany and other countries during the past six calendar years are shown in Table 4, and total exports each year since 1892 in Table 5.

ASBESTOS.—TABLE 4.

1900 .....	16,993	693,105	39 61				

Although the chief source for the raw material, Canada does not as yet manufacture all the asbestos goods required for home consumption. There is, therefore, a considerable importation of asbestos goods under the import classification 'Asbestos in any form other than crude and all manufactures of,' the duty being 25 per cent. The annual value of the imports is shown in Table 6.

## ASBESTOS.—TABLE 6.

\* Asbestos in any form other than crude, and all manufactures of. Duty 25 per cent.

Outside of Canada the chief asbestos producing country is Russia, whose output in 1907 is reported as 9,356 metric tons. The United States, Cape Colony, and Cyprus are also producers, though the quantity is not important.

Table 7 shows the principal productions since 1902.
