Introduction

About the Standard

The purpose of this document is to provide a single standard for digital cartographic representation of geologic map features on Canadian Geoscience Maps (either Bedrock, Surficial or Marine) produced by the Geological Survey of Canada at scales of 1:50 000 – 1:250 000. For special purpose or non-standard scale maps the standard will serve as a guide and Cartographic Representation (CartoRep) procedures will be used to modify symbology for specific graphic needs.

This standard was compiled by three geological legend committees (Surficial, Bedrock and Marine) and the Open Geoscience subdivision which reviewed existing formal and informal geologic map symbolization standards and adapted them for use with digital mapping systems and the current geospatial data models developed in-house.

Required Files

This standard consists of...

- this reference document (GSC Symbol Standard Catalogue)
- an ArcGIS style file (GSC_SymbolStandard.style)
- four TrueType fonts (GSC_SymbolStandard1.ttf, GSC_SymbolStandard2.ttf, GSC_SymbolStandard3.ttf, GSCGeology2015.ttf)

The reference document can be found under the [CGM Production folder on GCDOCs](#). The style file and fonts are part of a Canadian Geoscience Map Production toolbox which can be downloaded from the [NRCan Wiki under the GMF Support](#).

Revisions to the Standard

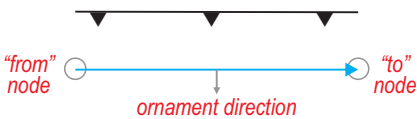

While this standard is primarily intended for internal use on Canadian Geoscience Maps, the creators realize that other government or private sector organizations may utilize this standard and therefore welcomes user comments and suggestions for improvement.

Requests for the addition of a new symbol (feature) or modification to an existing symbol (feature) in the standard must be done by filling out the appropriate Feature Modification Form [<ADD LINK TO FORM>](#) and submitting it to the appropriate legend committee for review. If the committee accepts the request, the new symbol (feature) or modification will be incorporated into the data model and symbol standard for the next version release.

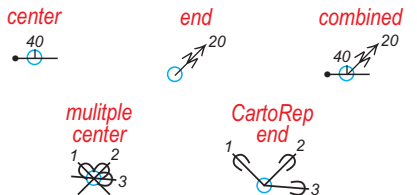

Although this standard is considered formalized, it is not intended to be inflexible. Certain situations may occur where an existing symbol might need to be modified visually to fit a particular geologic situation or setting. Cartographic Representation (CartoRep) procedures should be utilized to obtain this **visual only** change. Examples would include: change colour of point symbol to denote legacy data; change line thickness for better clarity in complex areas; change spacing of line ornamentation for less cluttering; change colour of line due to colour of unit underneath; etc. Examples of what cannot be changed with CartoRep would include: change official colour of a surficial unit; change complete look on a line ornament or point symbol; etc.

General Concepts

RIGHT -HAND RULE: All line symbols in this standard follow the right-hand rule. This concept places the geological feature (ornamentation) being depicted on the right-hand side of the line feature based on the direction of digitizing (i.e. the first vertex digitized or the “from” node to the last vertex digitized or the “to” node).

POINT OF OBSERVATION: All point symbols in this standard have a point of observation that is at the center of the symbol (at center of cyan circle), except Bedrock Lamination symbols which will have the point of observation that is at the end of the symbol (because they usually radiate from the center of another symbol). For visual clarity on a map, the user may wish to use CartoRep to change the point of observation from the center of the symbol to the end of the symbol (such may be the case for multiple crossed striations at a single station).

LOCATIONAL ACCURACY: Some line symbols in this standard have up to four levels of locational accuracy which communicates the locatability in the field and its positioning on the base map.

Level	Description	Example statement	Symbology
Defined	A feature is observable and its plotted position on the map is within tolerance levels.	“I can clearly see this contact in outcrop, and I can accurately plot its position on the map.”	<div>—</div> <div>Solid line</div>
Approximate	A feature is observable, but its plotted position on the map may not be within tolerance levels.	“I can see this contact in outcrop, but the poor quality of my base map prohibits me from accurately plotting its position.”	<div>— — — —</div> <div>4.0mm dashed line</div>
Inferred	A feature is not directly observable (between outcrops or beneath rubble or vegetation), so its location is inferred by indirect means; therefore its plotted position on the map may not be within tolerance levels.	“I can see by the change in debris materials visible that a contact runs through here, but I can’t locate it very precisely.”	<div>— — — —</div> <div>2.0mm dashed line</div>
Concealed	A feature is not observable because it is completely concealed (beneath an overlying map unit or body or water or ice), although it may be observable nearby; therefore its plotted position on the map may not be within tolerance levels.	“I can see that a contact is present on both sides of this lake, but I can’t tell where it is located beneath the water.”	<div>— — — — —</div> <div>1.0mm dashed line</div>

1 Topographic Base Symbolology

1.1 Source

The Geological Survey of Canada utilizes CanVec topographic base information for the production of the Canadian Geoscience Map series. CanVec is a digital cartographical reference product produced by Natural Resources Canada that originates from the best available data sources and offers quality topographical information in vector format. CanVec data is available at no cost on the Open Government of Canada website (<http://open.canada.ca/en>) using the Geospatial Data Extraction tool.

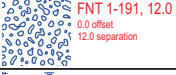

1.2 Modifications

The Canadian Geoscience Map series depicts most features contained in the CanVec data layers. Some layers are omitted outright (such as wooded areas) and some layers are optional to the author (such as wetlands or buildings). The cartographer may also decide (for clarity reasons) to only depict the index contours for maps in areas of high elevation changes.

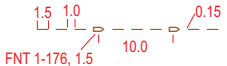

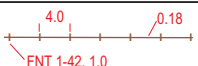

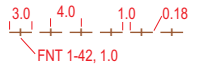

Although CanVec has an established style of topographic symbology, the CGM series alters all colours of features to either brown (RGB 153·89·51) or blue (RGB 51·89·153) and has also grouped or modified some symbology for clarity reasons.

1.3 CGM Topographic Base Symbolology

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage

4 - MISCELLANEOUS							
1.04.01.001	Unassigned annotation	none	Unassigned FNT Arial baseline-left justified	255-0-255	not usually shown in legend		annotation needs to be assigned to an annotation class

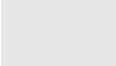

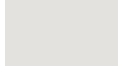

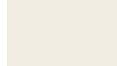

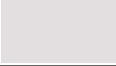

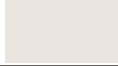

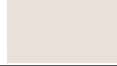

2 Cartographic Elements

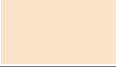

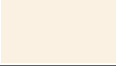

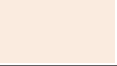

2.1 About

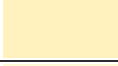

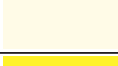

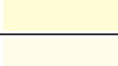

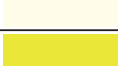

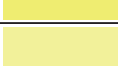

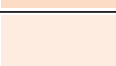

The symbology in this section mainly pertains to cartographic elements used to create the CGM surround (legend, descriptive notes, titleblock, border, NTS reference map, location map, etc.), geological annotation, undefined features, cartographic features (leader lines, etc.) as well as the complete GSC colour shadeset.

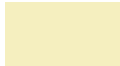

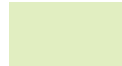

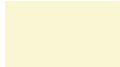

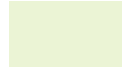

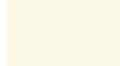

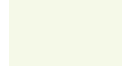

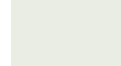

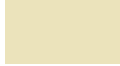

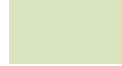

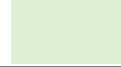

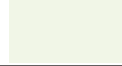

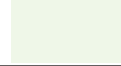

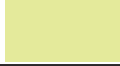

2.2 CGM Cartographic Elements Symbology

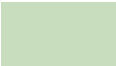

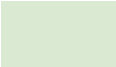

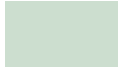

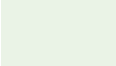

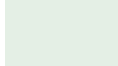

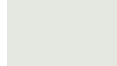

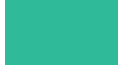

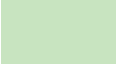

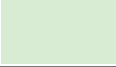

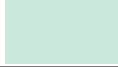

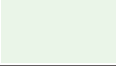

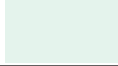

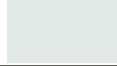

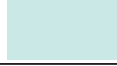

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
1 - UNDEFINED FEATURES							
2.01.01.001	Geomorphological line : undefined	none		255·0·255	not shown in legend		
2.01.01.002	Geological boundary coincident with another feature : defined	none		255·128·0	not shown in legend		
2.01.01.003	Geological boundary coincident with another feature : approximate	none		255·128·0	not shown in legend		
2.01.01.004	Geological boundary coincident with another feature : inferred	none		255·128·0	not shown in legend		
2.01.01.005	Geological boundary coincident with another feature : concealed	none		255·0·255	not shown in legend		
2.01.01.006	Geomorphological point : undefined	none		255·0·255	not shown in legend		
2.01.01.007	Field observation point : undefined	none		255·0·255	not shown in legend		
2.01.01.008	Unmapped area	none	no fill colour no outline	0·0·0	not shown in legend		
2.01.01.009	Geomorphological polygon : undefined	none		255·0·255	not shown in legend		
2.01.01.010	Map unit polygon : undefined	none		255·0·255	not shown in legend

1.9 - Glaciomarine sediments (continued)							
3.01.09.513	Glaciomarine littoral and nearshore sediments	none	 no outline	172·211·240	GMn	0047L	
3.01.09.519	Glaciomarine offshore sediments	none	 no outline	0·151·217	GMo	0048L	
3.01.09.527	Glaciomarine submarine outwash fan sediments	none	 no outline	82·142·178	GMf	0049L	
3.01.09.517	Glaciomarine submarine moraine complex	none	 no outline	45·166·222	GMm	0050L	
3.01.09.483	Glaciomarine veneer	none	 no outline	175·210·225	GMv	0051L	
3.01.09.485	Glaciomarine blanket	none	 no outline	125·186·209	GMb	0052L	
3.01.09.515	Glaciomarine sediments, undifferentiated	none	 no outline	119·187·231	GM	0053L	
1.10 - Till							
3.01.10.357	Rock-glacierized moraines	none	 no outline	157·206·119	Tg	0074L	
3.01.10.375	Hummocky till	none	 no outline	163·202·153	Th	0075L	
3.01.10.377	Moraine complex	none	 no outline	132·187·118	Tm	0076L	
3.01.10.385	Ridged till, moraine	none	 no outline	162·212·157	Tr	0077L	
3.01.10.387	Streamlined till	none	 no outline	128·198·121	Ts	0078L	
3.01.10.439	Till plain	none	 no outline	40·120·79	Tp	0079L	
3.01.10.057	Weathered till	none	 no outline	141·124·98	Tx	0080L	
3.01.10.355	Till veneer	none	 no outline	185·219·157	Tv	0081L	
3.01.10.359	Till blanket	none	 no outline	133·197·83	Tb	0082L	

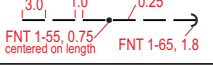

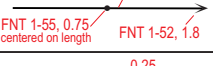

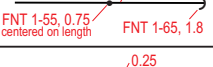

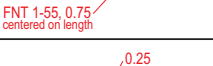

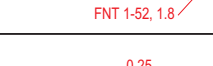

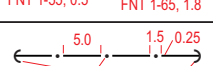

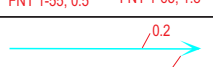

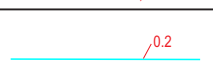

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Label	Legend Order	Notes on usage
1 - SURFICIAL UNITS (continued)							
1.10 - Till (continued)							
3.01.10.373	Till, undifferentiated	none	 no outline	200·221·189	T	0083L	
1.11 - Weathering deposits							
3.01.11.175	Weathered bedrock or regolith veneer	none	 no outline	219·145·139	Wv	0084L	
3.01.11.169	Weathered bedrock or regolith blanket	none	 no outline	218·64·52	Wb	0085L	
3.01.11.177	Weathered bedrock or regolith, undifferentiated	none	 no outline	206·108·108	W	0086L	
1.12 - Undifferentiated deposits							
3.01.12.082	Undifferentiated deposits	none	 no outline	216·198·192	U	0089L	
1.13 - Bedrock							
3.01.13.192	Sedimentary bedrock	none	 no outline	252·211·201	R1	0090L	
3.01.13.187	Igneous bedrock	none	 no outline	242·133·128	R2	0091L	
3.01.13.183	Metamorphic bedrock	none	 no outline	250·191·190	R3	0092L	
3.01.13.185	Bedrock, undifferentiated	none	 no outline	246·152·158	R	0093L	
1.14 - Anthropogenic deposits							
3.01.14.715	Anthropogenic deposits, undifferentiated	none	 no outline	193·139·138	H	0003L	
1.15 - Glacial ice or snowpack							
3.01.15.001	Snowpacks	none	 FNT 1-172, 10.0 0.0 offset 10.0 separation no outline	217·255·255	Isn	0001L	do not label polygons for this unit unless map uses both glacier units
3.01.15.002	Glacier or icefield or icecap	none	 FNT 1-172, 10.0 0.0 offset 10.0 separation no outline	179·255·255	I	0002L	do not label polygons for this unit unless map uses both glacier units
1.16 - Glacial ice or snowpack							
3.01.16.705	Volcanic pyroclastic sediments	none	 no outline	192·140·156	Vpy	0087L	
3.01.16.707	Volcanic deposits, undifferentiated	none	 no outline	174·104·130	V	0088L	

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
2 - MAP UNIT BOUNDARIES							
3.02.01.001	Geological contact : defined	none		0-0-0		0129L	
3.02.01.002	Geological contact : approximate	none		0-0-0		0130L	
3.02.01.003	Geological contact : inferred	none		0-0-0		0131L	
3.02.01.004	Geological contact : concealed	none		0-0-0		0132L	
3.02.01.005	Limit of mapping	none		0-0-0		0134L	
3.02.01.006	Limit of mapping : neatline	none		77-230-0	not shown on map		
3 - ANTHROPOGENIC							
3.03.01.001	Drillhole location	none		0-0-0		0277L	annotation depicted with text symbol 2.03.01.008
3.03.01.002	Pit : small, active	none		0-0-0		0121L	
3.03.01.003	Pit : small, inactive	none		0-0-0		0120L	
3.03.01.004	Quarry : small, active	none		0-0-0		0127L	
3.03.01.005	Quarry : small, inactive	none		0-0-0		0126L	
3.03.01.006	Made ground (fill)	none		0-0-0		0123L	
3.03.01.007	Mine tailing	none		0-0-0		0122L	
3.03.01.008	Peat bog mining	none		0-0-0		0128L	
3.03.01.009	Pit : large	none		0-0-0		0118L 0119L	inactive: centroid (☒) must be added as annotation (FNT 1-39) active: centroid (☒) must be added as annotation (FNT 1-38)
3.03.01.010	Quarry : large	none		0-0-0		0124L 0125L	inactive: centroid (☒) must be added as annotation (FNT 1-41) active: centroid (☒) must be added as annotation (FNT 1-40)

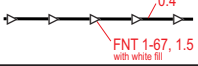

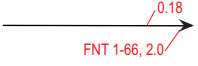

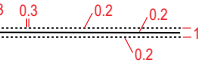

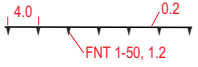

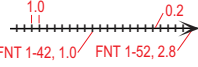

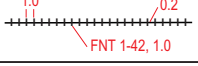

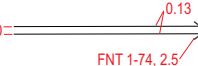

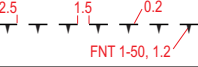

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
4 - BEDROCK							
3.04.01.001	Sinkhole : small	none		0-0-0		0117L	
3.04.01.002	Outcrop	none		0-0-0		0276L	
3.04.01.003	Tor	none		0-0-0		0273L	
3.04.01.005	Bedrock scarp	none		0-0-0		0236L	
3.04.01.006	Lineament or lineation in bedrock	none		0-0-0		0237L	
3.04.01.007	Sinkhole : large	none		0-0-0		0116L	centroid (SH) must be added as annotation (FNT 1-44)
3.04.01.008	Mineral occurrence	none		0-0-0		0274L	annotation depicted with text symbol 2.03.01.003
5 - EOLIAN							
3.05.01.001	Deflation landform : paleowind direction known	none		0-0-0		0248L	
3.05.01.002	Paleowind measurement	none		0-0-0		0246L	
3.05.01.003	Dune Crest : large	none		0-0-0		0106L	symbol 3.15.01.002 to be used in legend
3.05.01.005	Active dune field	none		0-0-0		0105L	
3.05.01.006	Eolian lag deposit (deflation surface)	none		0-0-0		0110L	
3.05.01.007	Deflation landform : paleowind direction unknown	none		0-0-0		0247L	
3.05.01.008	Dune Crest : small, known	none		0-0-0		0108L	symbol should have an angle of rotation
3.05.01.009	Dune Crest : small, unknown	none		255-0-0		0107L	
6 - GLACIAL							
3.06.01.001	Kettle : small	none		0-0-0		0115L	

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
6 - GLACIAL (continued)							
3.06.01.003	Arête	none		0-0-0		0223L	
3.06.01.004	Cirque headwall	none		0-0-0		0222L	
3.06.01.005	Crevasse ridge	none		0-255-255		0199L	
3.06.01.006	Major moraine ridge : lateral/laterofrontal	none		0-0-0		0184L	
3.06.01.007	Major moraine ridge : lateral/laterofrontal ice-cored	none		0-0-0		0187L	
3.06.01.008	Major moraine ridge : medial	none		0-0-0		0185L	
3.06.01.009	Major moraine ridge : medial ice-cored	none		0-0-0		0188L	
3.06.01.010	Major moraine ridge : end	none		0-0-0		0186L	
3.06.01.011	Major moraine ridge : end ice-cored	none		0-0-0		0189L	
3.06.01.012	Minor moraine ridge : large	none		0-0-0		0181L	symbol 3.15.01.003 to be used in legend
3.06.01.013	Kettle : large	none		0-0-0		0114L	centroid (K) must be added as annotation (FNT 1-45)
3.06.01.014	Recently deglaciated area	none		255-255-255		0098L	white pattern over any geological unit colour
3.06.01.015	Minor moraine ridge : small, known	none		0-0-0		0183L	symbol should have an angle of rotation
3.06.01.017	Minor moraine ridge : small, unknown	none		255-0-0		0182L	
7 - ICE-CONTACT							
3.07.01.001	Ice-contact delta	none		0-0-0		0255L 0256L	unknown: no angle of rotation known: symbol should have an angle of rotation
3.07.01.002	Kame	none		0-0-0		0261L	
3.07.01.003	Buried esker ridge : known	none		0-0-0		0194L	

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
7 - ICE-CONTACT (continued)							
3.07.01.004	Buried esker ridge : unknown	none		0-0-0		0193L	
3.07.01.005	Esker ridge : known	none		0-0-0		0196L	
3.07.01.006	Esker ridge : unknown	none		0-0-0		0195L	
3.07.01.007	Ice-contact scarp	none		0-0-0		0190L	
3.07.01.008	Ice-pushed ridge	none		0-0-0		0191L	
3.07.01.009	Ice-thrust ridge	none		0-0-0		0192L	
3.07.01.010	Esker ridge with beach ridge/strandlines : known or inferred	none		0-0-0		0198L	
3.07.01.011	Esker ridge with beach ridge/strandlines : unknown	none		0-0-0		0197L	
8 - ICE-MOVEMENT							
3.08.01.001	Buried drumlin ridge : small	none		0-0-0		0205L	symbol should have an angle of rotation
3.08.01.002	Buried drumlinoid ridge or fluting : small	none		0-0-0		0201L	symbol should have an angle of rotation
3.08.01.003	Crag-and-tail ridge : small	none		0-0-0		0209L	symbol should have an angle of rotation
3.08.01.004	Drumlin ridge : small	none		0-0-0		0207L	symbol should have an angle of rotation
3.08.01.005	Drumlinoid ridge or fluting : small	none		0-0-0		0203L	symbol should have an angle of rotation
3.08.01.006	Fluted bedrock or drift : small, known	none		0-0-0		0221L	symbol should have an angle of rotation
3.08.01.007	Fluted bedrock or drift : small, unknown	none		0-0-0		0219L	symbol should have an angle of rotation
3.08.01.008	Striation : poorly defined, known	none		0-0-0		0265L	symbol should have an angle of rotation symbol 3.15.01.001 to be used in legend if ages exist
3.08.01.009	Striation : poorly defined, unknown	none		0-0-0		0264L	symbol should have an angle of rotation

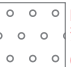

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
8 - ICE-MOVEMENT (continued)							
3.08.01.010	Striation : well defined, known	none		0-0-0		0267L	symbol should have an angle of rotation symbol 3.15.01.001 to be used in legend if ages exist
3.08.01.011	Striation : well defined, unknown	none		0-0-0		0266L	symbol should have an angle of rotation
3.08.01.012	Till fabric measurement location : known	none		0-0-0		0263L	symbol should have an angle of rotation
3.08.01.014	Buried drumlin ridge : large	none		0-0-0		0204L	
3.08.01.015	Buried drumlinoid ridge or fluting : large	none		0-0-0		0200L	
3.08.01.016	Crag-and-tail ridge : large	none		0-0-0		0208L	
3.08.01.017	Drumlin ridge : large	none		0-0-0		0206L	
3.08.01.018	Drumlinoid ridge or fluting : large	none		0-0-0		0202L	
3.08.01.019	Fluted bedrock or drift : large, known	none		0-0-0		0220L	
3.08.01.020	Fluted bedrock or drift : large, unknown	none		0-0-0		0218L	
3.08.01.021	Groove : large, known	none		0-0-0		0213L	
3.08.01.022	Groove : large, unknown	none		0-0-0		0212L	
3.08.01.024	Ice-flow direction : known	none		0-255-255		0225L	
3.08.01.025	Ice-flow direction : unknown	none		0-255-255		0224L	
3.08.01.026	Till fabric measurement location : unknown	none		0-0-0		0262L	symbol should have an angle of rotation
3.08.01.029	Fluted bedrock or drift : small, poorly defined, known	none		0-0-0		0217L	symbol should have an angle of rotation
3.08.01.030	Fluted bedrock or drift : small, poorly defined, unknown	none		0-0-0		0215L	symbol should have an angle of rotation

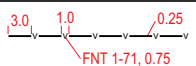

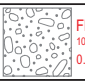

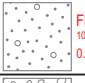

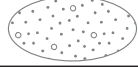

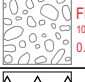

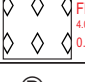

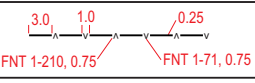

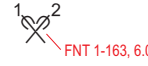

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
8 - ICE-MOVEMENT (continued)							
3.08.01.033	Fluted bedrock or drift : large, poorly defined, known	none		0-0-0		0216L	
3.08.01.034	Fluted bedrock or drift : large, poorly defined, unknown	none		0-0-0		0214L	
3.08.01.035	Striation from legacy data : poorly defined, known	none		255-0-0		0269L	symbol should have an angle of rotation
3.08.01.036	Striation from legacy data : poorly defined, unknown	none		255-0-0		0268L	symbol should have an angle of rotation
3.08.01.037	Striation from legacy data : well defined, known	none		255-0-0		0271L	symbol should have an angle of rotation
3.08.01.038	Striation from legacy data : well defined, unknown	none		255-0-0		0270L	symbol should have an angle of rotation
3.08.01.039	Pre-crag ridge : small	none		0-0-0		0211L	symbol should have an angle of rotation
3.08.01.040	Pre-crag ridge : large	none		0-0-0		0210L	
3.08.01.041	Dispersal train margin : defined, large, left	none		0-0-0		0230L	symbol 3.15.01.010 to be used in legend
3.08.01.042	Dispersal train margin : defined, large, right	none		0-0-0		0231L	symbol 3.15.01.010 to be used in legend
3.08.01.043	Dispersal train margin : approximate, large, left	none		0-0-0		0228L	symbol 3.15.01.011 to be used in legend
3.08.01.044	Dispersal train margin : approximate, large, right	none		0-0-0		0229L	symbol 3.15.01.011 to be used in legend
9 - MASS-WASTING							
3.09.01.001	Avalanche track : small	none		0-0-0		0137L	symbol should have an angle of rotation
3.09.01.002	Debris flow : small	none		0-0-0		0139L	symbol should have an angle of rotation
3.09.01.003	Landslide scar	none		0-0-0		0142L 0143L	unknown: no angle of rotation known: symbol should have an angle of rotation
3.09.01.004	Retrogressive thaw flow	none		0-0-0		0144L 0145L	unknown: no angle of rotation known: symbol should have an angle of rotation
3.09.01.005	Slope movement : unspecified	none		0-0-0		0146L	symbol should have an angle of rotation

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
9 - MASS-WASTING (continued)							
3.09.01.006	Landslide escarpment : active	none		0-0-0		0141L	symbol 3.15.01.004 to be used in legend
3.09.01.007	Landslide escarpment : inactive	none		0-0-0		0140L	symbol 3.15.01.005 to be used in legend
3.09.01.008	Avalanche track : large	none		0-0-0		0136L	
3.09.01.009	Debris flow : large	none		0-0-0		0138L	
3.09.01.010	Tension fracture	none		0-0-0		0135L	
10 - PALEODRAINAGE							
3.10.01.001	Alluvial fan	none		0-0-0		0251L 0252L	unknown: no angle of rotation known: symbol should have an angle of rotation
3.10.01.002	Piping depression	none		0-0-0		0250L	
3.10.01.003	Paleocurrent measurement : sediments	none		0-0-0		0257L	symbol should have an angle of rotation
3.10.01.004	Paleocurrent measurement : bedrock (p, s-forms)	none		0-0-0		0258L	symbol should have an angle of rotation
3.10.01.005	Meltwater channel : major	none		0-0-0		0174L 0175L	opposite side must be digitized backwards unknown: symbol 3.15.01.005 to be used in legend known: symbol 3.15.01.014 to be used in legend
3.10.01.006	Meltwater channel lateral : left	none		0-0-0		0172L	uphill on left
3.10.01.007	Meltwater channel lateral : right	none		0-0-0		0173L	uphill on right
3.10.01.008	Meltwater channel : minor, known	none		0-0-0		0171L	
3.10.01.009	Meltwater channel : minor, unknown	none		0-0-0		0170L	
3.10.01.010	Paleodrainage direction	none		0-0-0		0169L	
3.10.01.011	Partly buried channel scarp	none		0-0-0		0178L	opposite side must be digitized backwards symbol 3.15.01.008 to be used in legend
3.10.01.012	Spillway : known	none		0-0-0		0168L	

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
10 - PALEODRAINAGE (continued)							
3.10.01.013	Buried valley : known	none		0-0-0		0180L	
3.10.01.014	Buried valley : unknown	none		0-0-0		0179L	
3.10.01.015	Subglacial meltwater corridor margin : defined	none		0-0-0		0177L	opposite side must be digitized backwards symbol 3.15.01.012 to be used in legend
3.10.01.016	Subglacial meltwater corridor margin : approximate	none		0-0-0		0176L	opposite side must be digitized backwards symbol 3.15.01.013 to be used in legend
3.10.01.017	Spillway : unknown	none		0-0-0		0167L	
11 - PALEOGEOGRAPHY							
3.11.01.001	Ice divide : defined	none		255-0-0		0235L	
3.11.01.002	Ice divide : approximate	none		255-0-0		0234L	
3.11.01.003	Ice stream margin : defined	none		0-0-255		0233L	
3.11.01.004	Ice stream margin : approximate	none		0-0-255		0232L	
3.11.01.005	Limit of glaciation : defined	none		0-0-0		0227L	
3.11.01.006	Limit of glaciation : approximate	none		0-0-0		0226L	
3.11.01.007	Limit of submergence : glaciolacustrine, defined	none		0-0-0		0164L	
3.11.01.008	Limit of submergence : glaciolacustrine, approximate	none		0-0-0		0163L	
3.11.01.009	Limit of submergence : glaciomarine, defined	none		0-0-0		0162L	
3.11.01.010	Limit of submergence : glaciomarine, approximate	none		0-0-0		0161L	
3.11.01.011	Limit of submergence : lacustrine, defined	none		0-128-255		0158L	
3.11.01.012	Limit of submergence : lacustrine, approximate	none		0-128-255		0157L	

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
11 - PALEOGEOGRAPHY (continued)							
3.11.01.013	Limit of submergence : marine, defined	none		128-0-255		0160L	
3.11.01.014	Limit of submergence : marine, approximate	none		128-0-255		0159L	
12 - PERMAFROST / PERIGLACIAL

4 Bedrock Symbolology

4.1 Bedrock Concepts

MINERAL ABBREVIATIONS: The Bedrock Legend Committee has decided that annotation for mineral occurrences (point) and alteration zones (polygon) will be shown as mineral abbreviations (*see* Appendix 6.1) which were adopted from Whitney and Evans (2010).

UNIT COLOURS: Colours for map units must be chosen from available shades in the current GSC ArcGIS Shadeset (section 3.2 of this document), but the Bedrock Legend Committee suggests the following guidelines...

Phanerozoic units:

It is recommended that the colour design for Phanerozoic sedimentary and metamorphic units follow as closely as possible that of the International Commission on Stratigraphy (ICS) International Chronostratigraphic Chart (*see* Appendix 6.2). As required, modified shades can be added for broader age divisions.

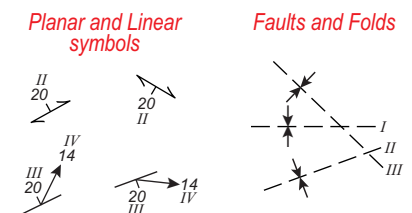

For volcanic rocks, shades of green are recommended, with lighter shades for felsic and alkalic compositions, and darker shades for those that are mafic and ultramafic. For plutonic rocks, the following colour shades are recommended: lighter and darker pink tones for granitic, syenitic, and tonalitic rocks; orange for carbonatitic rocks; and shades of lilac and purple for gabbroic and peridotitic rocks.

Precambrian units:

For Precambrian units, colours on the ICS chart tend to be too restrictive. Consequently, the following range of colours are recommended to properly reflect common lithological compositions: shades of yellow, grey, and brown for sandier to muddier clastic rocks; shades of blue for carbonates; shades of green for volcanic rocks; shades of red and fuchsia for felsic plutonic rocks; shades of violet and purple for mafic and ultramafic units; and shades of pale pink and orange for (ortho) gneissic units.

In order to emphasize potential domainal affinities of Precambrian map units, the use of differing colour palettes for different tectonic domains can be considered (e.g. in order to distinguish the Archean Slave from Churchill cratons shades of grey and salmon, vs shades of pink and orange, respectively, could be used).

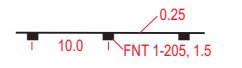

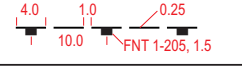

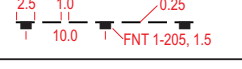

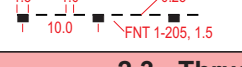

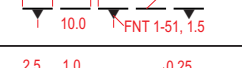

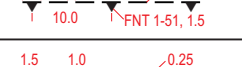

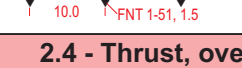

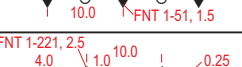

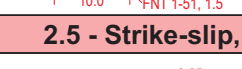

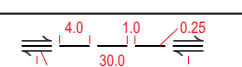

GENERATIONS: Instead of creating hundreds of symbols to indicate the generation of a feature, the Bedrock Legend Committee decided to depict generation as annotation beside the feature. The annotation will be roman numerals (Times Roman Italic font). Annotation for line features (faults and folds) will be placed at the end of the line feature (or as close as possible) and for point features (planar and linear), it will be placed near the dip or plunge value (keeping the dip or plunge value closest to the symbol).

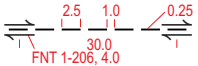

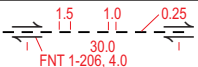

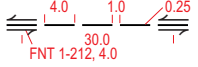

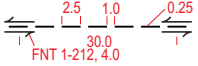

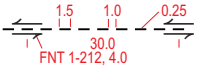

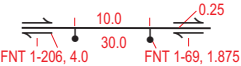

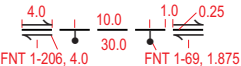

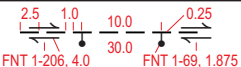

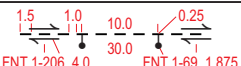

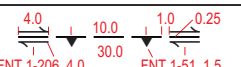

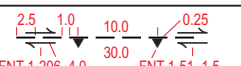

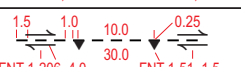

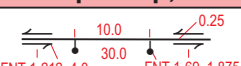

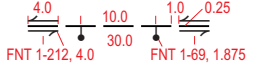

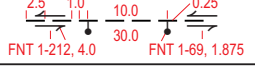

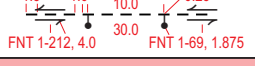

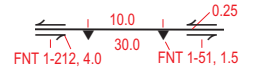

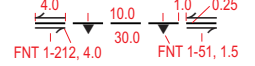

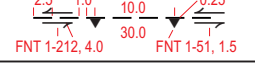

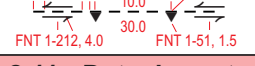

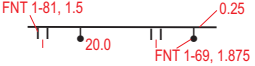

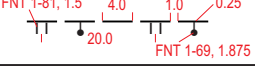

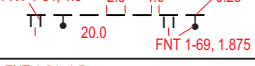

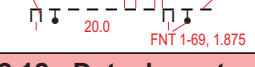

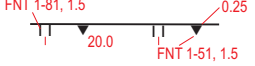

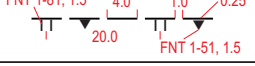

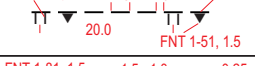

AGE DESIGNATORS: Also known as the “GSC Special Font”, these are special characters used to depict certain Bedrock units on the map face and in surround information. All characters necessary are contained within the GSCGeology2015 true type font. In 2015, the Bedrock Legend Committee reviewed the list of age designators, some new designations were added while others were made obsolete (*see* Appendix 6.3).

14 - PLANAR ORIENTATIONS (continued)							
14.33 - Shear zone, sinistral-normal							
4.14.33.001	Shear zone, sinistral-normal : measured	none	 FNT 2-228, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.33.002	Shear zone, sinistral-normal : estimated	none	 FNT 2-229, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.34 - Shear zone, sinistral-reverse							
4.14.34.001	Shear zone, sinistral-reverse : measured	none	 FNT 2-230, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.34.002	Shear zone, sinistral-reverse : estimated	none	 FNT 2-231, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.35 - Axial plane, not defined							
4.14.35.001	Axial plane, not defined : measured	transpositional	 FNT 2-232, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.35.002	Axial plane, not defined : estimated	transpositional	 FNT 2-233, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.36 - Axial plane, anticline							
4.14.36.001	Axial plane, anticline : measured	none	 FNT 2-234, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.36.002	Axial plane, anticline : estimated	none	 FNT 2-235, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.37 - Axial plane, syncline							
4.14.37.001	Axial plane, syncline : measured	none	 FNT 2-236, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.37.002	Axial plane, syncline : estimated	none	 FNT 2-237, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.38 - Axial plane, crenulation							
4.14.38.001	Axial plane, crenulation : measured	none	 FNT 2-238, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.38.002	Axial plane, crenulation : estimated	none	 FNT 2-239, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.39 - Axial plane, kink-band							
4.14.39.001	Axial plane, kink-band : measured	none	 FNT 2-240, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.39.002	Axial plane, kink-band : estimated	none	 FNT 2-241, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")

Symbol #	English Description	Other Keywords	Symbol Specifications	RGB Colour	Legend Appearance	Legend Order	Notes on usage
14 - PLANAR ORIENTATIONS (continued)							
14.40 - Axial plane, minor S fold							
4.14.40.001	Axial plane, minor S fold : measured	none	 FNT 2-242, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.40.002	Axial plane, minor S fold : estimated	none	 FNT 2-243, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.41 - Axial plane, minor Z fold							
4.14.41.001	Axial plane, minor Z fold : measured	none	 FNT 2-244, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.41.002	Axial plane, minor Z fold : estimated	none	 FNT 2-245, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.42 - Axial plane, minor U fold							
4.14.42.001	Axial plane, minor U fold : measured	none	 FNT 2-246, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.42.002	Axial plane, minor U fold : estimated	none	 FNT 2-247, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.43 - Cleavage							
4.14.43.001	Cleavage : measured	cleavage-slaty cleavage-spaced	 FNT 2-248, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.43.002	Cleavage : estimated	cleavage-slaty cleavage-spaced	 FNT 2-249, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.44 - Cleavage, crenulation							
4.14.44.001	Cleavage, crenulation : measured	none	 FNT 2-250, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.44.002	Cleavage, crenulation : estimated	none	 FNT 2-251, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.45 - Schistosity and Foliation							
4.14.45.001	Schistosity and Foliation : measured	none	 FNT 2-252, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.45.002	Schistosity and Foliation : estimated	none	 FNT 2-253, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
14.46 - Gneissosity							
4.14.46.001	Gneissosity : measured	none	 FNT 2-254, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")
4.14.46.002	Gneissosity : estimated	none	 FNT 2-255, 6.0	0-0-0			vertical and horizontal shown with annotation ("0" or "90")

5 Appendix

5.1 Mineral Abbreviations

Acm	acmite	Act	actinolite	Adl	adularia	Aeg	aegirine
Ak	åkermanite	Ab	albite	Afs	alkali feldspar	Aln	allanite
Alm	almandine	Als	aluminosilicate	Alu	alunite	Amk	amakinite
Ame	amesite	Amp	amphibole	Anl	analcime (analcite)	Ant	anatase
And	andalusite	Adr	andradite	Ang	anglesite	Anh	anhydrite
Ank	ankerite	Ann	annite	An	anorthite	Ano	anorthoclase
Ath	anthophyllite	Atg	antigorite	Ap	apatite	Apo	apophyllite
Arg	aragonite	Arf	arvedsonite	Arm	armalcolite	Apy	arsenopyrite
Aug	augite	Aw	awaruite	Ax	axinite	Bab	babingtonite
Bdy	baddeleyite	Brt	barite (baryte)	Brs	barroisite	Bei	beidellite
Brl	beryl	Bt	biotite	Bxb	bixbyite	Bhm	böhmite (boehmite)
Bn	bornite	Brk	brookite	Brc	brucite	Bst	bustamite
Cal	calcite	Ccn	cancrinite	Cnl	cannilloite	Cb	carbonate mineral
Car	carpholite	Cst	cassiterite	Cel	celadonite	Cl	celestine
Cls	celsian	Cer	cerussite	Cbz	chabazite	Cct	chalcocite
Ccp	chalcopyrite	Chm	chamosite	Chs	chesterite	Chl	chlorite
Cld	chloritoid	Chn	chondrodite	Chr	chromite	Ccl	chrysocolla
Ctl	chrysotile	Cin	cinnabar	Cam	clinoamphibole	Clc	clinochlore
Cen	clinoenstatite	Cfs	clinoferrosilite	Chu	clinohumite	Cpt	clinoptilolite
Cpx	clinopyroxene	Czo	clinozoisite	Cl	clintonite	Coe	coesite
Coh	cohenite	Crd	cordierite	Crr	corrensite	Crn	corundum
Cv	covellite	Crs	cristobalite	Crt	crossite	Crl	cryolite
Cbn	cubanite	Cum	cummingtonite	Cpr	cuprite	Csp	cuspidine
Dph	daphnite	Dat	datolite	Dbr	daubreelite	Dee	deerite
Dia	diamond	Dsp	diaspore	Dck	dickite	Dg	digenite
Di	diopside	Dpt	diopside	Dol	dolomite	Drv	dravite

Dum	dumortierite	Eas	eastonite	Ec	ecandrewsite	Eck	eckermannite
Ed	edenite	Elb	elbaite	Ell	ellenbergerite	Eng	enargite
En	enstatite (ortho-)	Ep	epidote	Eri	erionite	Esk	eskolaite
Ess	esseneite	Eud	eudialite	Fas	fassaite	Fa	fayalite
Fsp	feldspar	Fac	ferro-actinolite	Fath	ferro-anthophyllite	Fbrs	ferrobarroisite
Fcar	ferrocarpholite	Fcel	ferroceladonite	Fec	ferro-eckermannite	Fed	ferro-edenite
Fgd	ferrogedrite	Fgl	ferroglaucophane	Fkrs	ferrokaersutite	Fny	ferronyboite
Fprg	ferropargasite	Frct	ferrorichterite	Fs	ferrosilite	Fts	ferrotschermakite
Fwn	ferrowinchite	Fi	fibrolite (fibrous sillimanite)	Fl	flourite	Fo	forsterite
Fos	foshagite	Frk	franklinite	Ful	fullerite	Ghn	gahnite
Glx	galaxite	Gn	galena	Grt	garnet	Ged	gedrite
Gh	gehlenite	Gk	geikielite	Gbs	gibbsite	Gis	gismondine

5.3 GSC Age Designators

The GSCGeology2015 True Type font contains the following...

- Full set of special Age characters (shown in table below) at full point size and stored under ALT-key locations (hold down the ALT key and enter the four digit code to obtain the special character).
- Full alphabet of capital letters at an 80% scaled factor and stored under regular keyboard locations.
- Full alphabet of lowercase letters at full point size and stored under regular keyboard locations.
- Full set of numbers at full point size and stored under regular keyboard locations.
- Only three symbol characters (dash, comma, and slash) at full point size and stored under regular keyboard locations.

AGCCCKCDEEEHHJMMMNOOQPPPPPPPPQRSSSSTTnmpeABCDEF GHIJKLMNOPQRSTUVWXYZabcdefghijklmnopqrstuvwxyz0123456789\,-

Symbol	ALT Key	Name	Symbol	ALT Key	Name	Symbol	ALT Key	Name
A	0161	Archean	mA	0200+0161	Mesoarchean	P	0185	Paleozoic
G	0162	Calymmian	mP	0200+0190	Mesoproterozoic	P	0186	Pennsylvanian
€	0163	Cambrian	M	0176	Mesozoic	P	0187	Permian
C	0164	Carboniferous	M	0177	Miocene	P	0188	Pleistocene
C	0165	Cenozoic	M	0178	Mississippian	P	0189	Pliocene
K	0166	Cretaceous	nA	0199+0161	Neoarchean	P	0190	Proterozoic
C	0167	Cryogenian	N	0179	Neogene	Q	0191	Quaternary
D	0168	Devonian	nP	0199+0190	Neoproterozoic	R	0192	Rhyacian
E	0169	Ectasian	O	0180	Oligocene	S	0193	Siderian
E	0170	Ediacaran	O	0181	Ordovician	S	0194	Silurian
eA	0202+0161	Eoarchean	O	0182	Orosirian	S	0195	Statherian
E	0171	Eocene	pA	0201+0161	Paleoarchean	S	0196	Stenian
H	0172	Hadean	P	0183	Paleocene	T	0197	Tonian
H	0174	Holocene	P	0184	Paleogene	T	0198	Triassic
J	0175	Jurassic	pP	0201+0190	Paleoproterozoic			

Age modifiers can be added before the unit reference including Lower l, Middle m, Upper u, Early E, Middle M, and Late L.

Obsolete designators include Aphebian **A**, Hadrynian **H**, Helikian **H**, Neohelikian **N**, Paleohelikian **P**, Precambrian (n/a), Recent **R**, and Tertiary **T**.
