## Foreword

We regret to announce that the *Bibliography of Seismology* will cease publication with Vol. 30, No. 6, September–December, 1964.

The Bibliography has been issued by the Observatory since 1926, appearing initially in the *Bulletin of the Seismological Society of America* (Vol. 17, 150–182, 218–248; Vol. 18, 16–23, 110–125, 214–235, 267–283; Vol. 19, 206–227) and then in the *Publications of the Dominion Observatory* Vols. 10, 12, 13, 14, 22, 30.

During this period seismology has vastly expanded in complexity, in the number of scientists involved and in the number of papers published. With the present staff, the Bibliography cannot be maintained and we have reluctantly decided to cease publication.

It is understood that the International Seismological Research Centre, 6 South Oswald Road, Edinburgh 9, Scotland, is studying the problem of continuing a seismological bibliography for 1965 onwards, the new bibliography being orientated towards the use of a computer to produce a subject index automatically. In time the internationally sponsored work may be extended to a comprehensive automatic seismological information retrieval service. One of the problems in undertaking such work is the development of sufficient data flow in the form of reprints, pamphlets and so on. We therefore suggest that the users of this Bibliography ensure that from now onwards the I.S.R.C. (Director, Dr. P. L. Willmore) be included in their distribution lists.

We intend to maintain our extensive and valuable file of seismological reprints in the Library of the Dominion Observatory, this file being available not only for staff scientists but also being frequently used by visiting scientists. We would therefore appreciate receiving reprints and pamphlets exactly as in the past. Seismological publications and contributions will, of course, be exchanged with institutions and others exactly as in the past.

This volume continues the policy initiated with Vol. 30, No. 1, January–April, 1963, in that each paper is listed only once and an author index, giving all authors, is included with this number. Similarly a subject index accompanies the issue. Mrs. F. E. Langill has continued acting as Chief Editor of the Bibliography.
