SOIL LEGEND

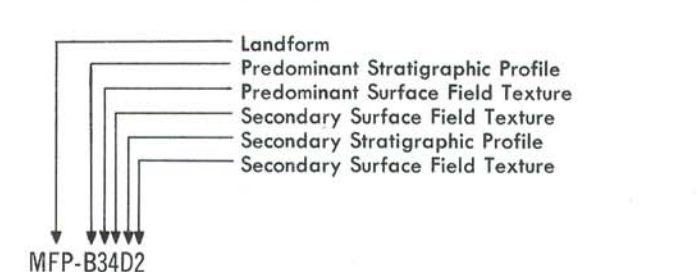

STRATIGRAPHY  
(0 to 4 feet)

- A Profiles consisting of coarse to moderately coarse materials
- B Profiles consisting of medium to moderately fine materials
- C Profiles consisting of fine materials
- D Profiles consisting of layers of coarse to moderately coarse and layers of medium to moderately fine materials
- E Profiles consisting of layers of coarse to moderately coarse and layers of fine materials
- F Profiles consisting of layers of medium to moderately fine and layers of fine materials
- G Profiles consisting of layers of coarse to moderately coarse and medium to moderately fine and fine materials

FIELD TEXTURAL CLASS  
(Surface Materials)

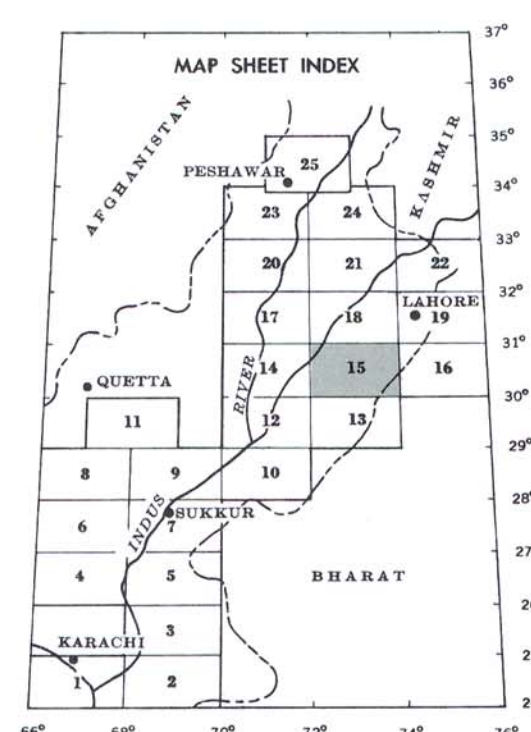

- 1 COARSE MATERIALS
- 2 MODERATELY COARSE MATERIALS
- 3 MEDIUM MATERIALS
- 4 MODERATELY FINE MATERIALS
- 5 FINE MATERIALS

EXAMPLE OF THE CONSTRUCTION OF A SOIL SYMBOL

The entire symbol represents a soil complex. MFP denotes that the landform is Meander Flood Plain. B34D2 represents the Soil Association. The position of B34 at the beginning of the symbol indicates that B profiles having medium to moderately fine materials are predominant and that class 3 is more common than class 4 on a surface material. Of lesser areal importance are D profiles in which layers of coarse to moderately coarse materials are interbedded with layers of medium to moderately fine materials with class 2 materials at the surface.
