A

GAZETTEER

of the

ISLAND OF NEWFOUNDLAND

based on the maps (1:50,000)

of the

NATIONAL TOPOGRAPHIC SYSTEM

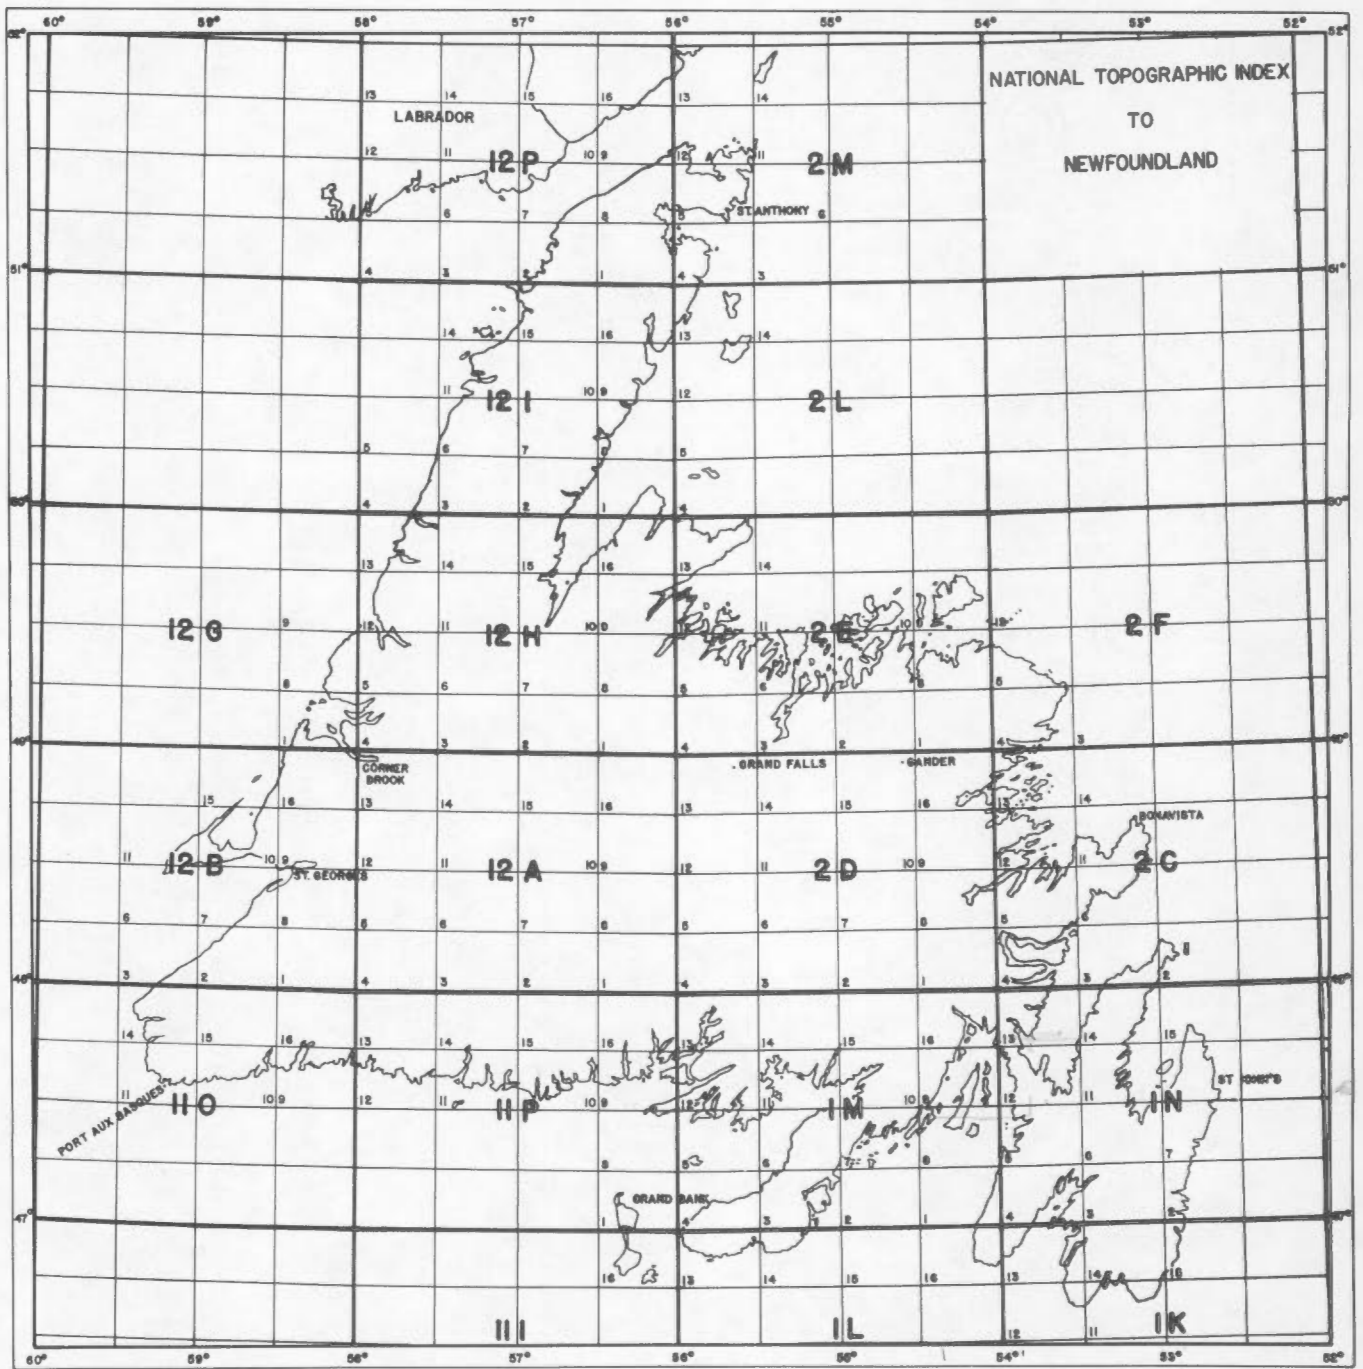

published by the

Department of Mines and Technical Surveys, Ottawa.

April 1961

Compiled by Ernest Reulean

The first column gives each of the typonyms printed on the maps.

Names printed in bold face type on the maps pertaining to cities, towns, settlements, etc. are indicated by undulated under-  
score, i.e. Corner Brook, Grand Falls, St. Johns, etc.

Names printed in italics on the maps pertaining to hydrography (rivers, lakes, bays, coves, etc.) are indicated by single underline, i.e. Barachois Lake, Exploits River, Fox Cove, etc.

Names printed in small capitals on the maps pertaining to topography (mountains, islands, capes, etc.) are indicated by double underline, i.e. Mount Sylvester, Gander Island, Cape Norman, etc.

The second column gives the reference to the sheet-name according to the National Topographic System.

The third column gives the reference to the code map-number of the sheet according to the National Topographic System.

When a name referring to the same typonym appears on more than one sheet, the sequence followed has been that of the code map-number.

The fourth column gives the reference to the numbers of the grid into which each sheet has been divided.

Each sheet has been divided into nine equal rectangles corresponding each to five minutes of latitude by five minutes of longitude according to the following diagram.

1	2	3
4	5	6
7	8	9

April 1961

Herbier Marie-Victorin,  
Université de Montréal,
