¹ Populated place data usually refer to a single city. However, in order to give a better sense of the size of metropolitan areas, the population symbol for their principal cities is shown as a circle of the same size as the metropolitan area population. This procedure is only feasible where the population of the principal city is at least 10% of the metropolitan area population. For the United States, metropolitan area population data are derived from the 1990 Census. For the United States, metropolitan area population data are derived from the 1990 Census. For the United States, metropolitan area population data are derived from the 1990 Census.

² The representation of political features on this map does not necessarily reflect the position of the Government of Canada on international issues of recognition, sovereignty or jurisdiction. Political borders as of 1 January 2005.
