

**Atlas of Canada 6th Edition
(archival version)**

The Arctic Coast 1602 to 1606

In the early seventeenth century, there were two voyages that explored the Labrador coastline and southern Baffin Island. These voyages were by Weymouth (1602) and Knight (1606). The map also shows the extent of territory known to Europeans in the period 1497 to 1650, and the navigation of all exploration routes during the period of the penetration of the Eastern Great Lakes and Hudson Bay from 1600 to 1650. The historical names found on the map are derived from contemporaneous maps and written documents of the period.
