(archival version)

Base-metal Mines, 2003

This map depicts the 30 base-metal mines that operated for any period during 2003. Base-metal mines produce primarily copper, nickel, zinc, lead, cobalt, molybdenum and magnesium. There were no active base-metal mines in the Yukon Territory, Nunavut, Alberta, Prince Edward Island, Nova Scotia or Newfoundland and Labrador for this year. The locations of 24 selected base-metal production facilities are shown to provide an industrial context for base-metal mining activity.

Lambert Conformal Conic Projection. Standard Parallels 49°N and 77°N
