(archival version)**
Base-metal Mines, 2004

This map depicts the 28 base-metal mines that operated for any period during 2004. Base-metal mines produce primarily copper, nickel, zinc, lead, cobalt, molybdenum and magnesium. There were no active base-metal mines in the Yukon Territory, Northwest Territories, Nunavut, Alberta, Prince Edward Island, Nova Scotia or Newfoundland and Labrador for this year. The locations of 22 selected base-metal production facilities are shown to provide an industrial context for base-metal mining activity.

0 150 300 450 600 km

Lambert Conformal Conic Projection. Standard Parallels 49°N and 77°N
