

Atlas of Canada 6th Edition
(archival version)

Ferrous-metal Mines, 2004

This map depicts the 6 ferrous-metal mines that operated for any period during 2004. Ferrous-metal mines produce iron ore, niobium and tantalum, all used in the production of steel and steel alloys. Only Newfoundland and Labrador, Quebec and Manitoba have ferrous-metal mines. The locations of 15 steel-production facilities, 3 iron-agglomerate plants and 4 ferroalloy plants are shown to provide an industrial context for ferrous-metal mining activity.

0 150 300 450 600 km

Lambert Conformal Conic Projection. Standard Parallels 49°N and 77°N
