

**Atlas of Canada 6th Edition
(archival version)**
**Combined Resource-reliant
Communities, 2001**

Each of the 84 communities shown on this map has a 30% or higher reliance on two of the resource sectors of agriculture, energy, fisheries, forestry or mining. The large majority of these communities are located in the four western provinces (48) or in Quebec (25). Most are small communities in terms of population: only Brant, Ontario and Val-d'Or, Quebec, have more than 12 000 people; five other communities in western Canada have 10 000 to 12 000 people. Almost all other communities have 2 000 or fewer inhabitants. The large majority of the communities are rural areas.

Lambert Conformal Conic Projection. Standard Parallels 49°N and 77°N
