Air Routes to Nunavut

In Nunavut, aircrafts are the ideal form of transportation for people because of the enormous distances between communities and vast areas of permafrost. Air transportation has developed rapidly, and now all communities are served on a daily basis. This contributes to Nunavut's economy because it allows for faster and easier access within the territory and to the southern regions.

Lambert Conformal Conic Projection. Standard Parallels 49°N and 77°N

Principal Air Routes Connecting to Nunavut

- Air Routes
- Airport Facilities in Nunavut
 - Major Entry
 - Regional Airport
 - Local Airport

Boundaries

- International
