EXAMPLE OF METHOD USED
TO GIVE A REFERENCE TO NEAREST 100 METRES
EXEMPLE DE LA METHODE EMPLOYEE
POUR FIXER DES REPÈRES A 100 MÈTRES PRÈS

REFERENCE POINT
POINT DE REPÈRE CHURCH - EGLISE (as above)
(ci-dessus)

EASTING: Read number on grid line
immediately to left of point.

NORTHING: Read number on grid line
immediately below point.

ABSCISSE: Note le chiffre de la ligne du
quadrillage immédiatement à gauche du
repère.

ESTIMÉ: Note le chiffre de la ligne du
quadrillage immédiatement en dessous du
repère.

Estimate length of a square from
this line eastward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.

Estimate the number of diagonals of the
square from this line northward to point.
