THE DECLINATION OF THE COMPASS NEEDLE, 1948

The declination of the compass needle at any place along a dashed line is the declination given on that dashed line. At other places the declination is between those given on the neighboring dashed lines, that is the place marked A, the declination is between 11° W. and 11° E. The current declinations of the compass needle are decreasing 6 minutes annually.
