REPRINT
OCT 4-72

Drawn and Printed by the Army Survey Establishment, R.C.E.
 Compiled from information and aerial photographs taken in 1950 and supplied by the Department of Lands and Forests, Province of Ontario.
 Published 1956.

THE DECLINATION OF THE COMPASS NEEDLE, 1956

The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is between those given on the neighboring red lines that are the places marked. At the declination is between 15°W and 14°W. The westerly declination of the compass needle are decreasing 4° a century annually.
