CANADA
MINES AND TECHNICAL SURVEYS
SURVEYS AND MAPPING BRANCH

NATIONAL TOPOGRAPHIC SERIES

THIRD EDITION

SHEET 82 NW

Compiled, drawn and printed at the office of the Surveyor General, Ottawa, 1934.
Reprinted with corrections, 1945.
Reprinted with corrections at the Surveys and Mapping Branch, Ottawa, 1955.

SHUSWAP
BRITISH COLUMBIA

Scale 2 miles to 1 inch or 1:126,720

Miles 0 1 2 4 6 8 10 Miles

Contour Interval 100 feet

NOTE: The grid squares provide a ready method of referring to or locating features. They are four miles to a side and subdivided into quarters by dotted lines. The east and west sides of the squares are not true north and south lines, but show a deflection to the west varying from 2' 15" on the east side of the map to 3' 00" on the west side. Any square is identified by the numbers along the outer border, for example, H6. Top will be found in the southeast corner of square 11272 and Enderby in the northeast corner of square 10250.

Copies may be obtained from the Map Distribution Office, Department of Mines and Technical Surveys, Ottawa, at 25 cents each.

| Church without spire or tower | Grain or flour mill | |
| Triangulation station | Other mill or factory | |
| Geodetic bench mark | Camera station | |
| | Height in feet | |

THE VARIATION OF THE COMPASS NEEDLE, JANUARY, 1952

The variation of the compass needle at any place along a red line is the variation given on that red line. At other places the variation is between those given on the neighbouring red lines. Thus at the place marked A, the variation is between 2' E and 2' W.
The variation of the compass needle is decreasing 3 1/2 minutes annually.
