THE DECLINATION OF THE COMPASS NEEDLE 1950

The declination of the compass needle at any place along a red line is the declination given on that red line. At other places the declination is between those given on the red line. The declination is between 33° 30' E. and 33° 30' W. The declination of the compass needle is decreasing 4' annually.

Surveys in 1947 and completion in 1950 by the Topographical Survey, from air photographs in 1948. Lithographed and printed by the Army Survey Establishment R.C.E., Department of National Defence, 1952.
