

# Elevation in Canada - CanVec – Elevation Features

Elevation Features entities are: Contour and Elevation Point. CanVec is a digital cartographic reference product of Natural Resources Canada (NRCan). It originates from the best available data sources covering Canadian territory, offers quality topographical information in vector format, and complies with international geomatics standards. CanVec is a multi-source product coming mainly from the National Topographic Data Base (NTDB), the Mapping the North process conducted by the Canada Center for Mapping and Earth Observation (CCMEO), the Atlas of Canada data, the GeoBase initiative, and the data update using satellite imagery coverage (e.g. Landsat 7, Spot, Radarsat, etc.).

## Geographic location

North: 85 East: -51  
South: 41 West: -141

## Additional informations

<b>Publication date</b>	2017-12-15
<b>Validity date</b>	1944 /
<b>Development phase of the dataset</b>	completed; compl��t��
<b>Revision cycle</b>	continual; continue
<b>Reference system</b>	EPSG:4617 ( <a href="http://www.epsg-registry.org/">http://www.epsg-registry.org/</a> ) , EPSG:5713 ( <a href="http://www.epsg-registry.org/">http://www.epsg-registry.org/</a> )
<b>Distribution format(s)</b>	GML (version 3.1.1), SHP (unknown version), FGDB / GDB (unknown version)
