

DATE OF PRODUCTION

Last release date: June 22, 2015

Publication of 203 NHN datasets, namely: 35 NHN-CL2 watersheds (WS) and 164 NHN-CL3 WS.

Within the framework of Quebec agreement, 5 NHN-CL2 WS in southern Quebec were produced using provincial data and several NHN-CL3 WS in northern Quebec were re-generated following WS limits redefinition.

Within the framework of Manitoba agreement, 69 NHN-CL3 were produced; in the south of Manitoba, 35 of these WS were produced using provincial data.

Also, with the arrival of 44 new NHN-CL3 WS in North-West Territories, more than 70 % of WS covering the NWT are now NHN-CL3 data compliant.

4 Canada/USA bi-national WS re-generated for data maintenance.
